Cook with Jamie Jamie Oliver, 2007-10-02 My guide to making you a better cook I can't tell you how long I've dreamed about writing this book It's the biggest book I've ever done and I've really tried to make it a timeless modern day classic Whether you're a student a young couple an established cook or a novice I'll take you through a whole load of simple and accessible recipes that will blow the socks off your family and any guests you might have round for dinner There's information on the equipment that I think you should have in your kitchen advice on how

to recognize and cook loads of different cuts of meat as well as on how to get the best value and quality when you're out shopping. With all of us consuming more processed food than ever it's a sad fact that most people just aren't confident enough to cook anymore. With this in mind now is the time for you to get stuck in and reclaim your fantastic cooking heritage. You know what if you're going to eat three times a day for the rest of your life you might as well learn to cook properly and enjoy it. So roll up your sleeves and let me help you. P.S. By the way you should feel good about buying this book because every single penny I make from it will go toward training and inspiring young kids from tough backgrounds all over the world to have a career in food through the Fifteen Foundation. So on behalf of them thank you.

Food Pedagogies Dr Elaine Swan, Dr Rick Flowers, 2015-12-28. In recent years everyone from politicians to celebrity chefs has been proselytizing about how we should grow, buy, prepare, present, cook, taste, eat and dispose of food. In light of this contributors to this book argue that food has become the target of intensified pedagogical activity across a range of domains including schools, supermarkets, families, advertising and TV media. Illustrated with a range of empirical studies this edited and interdisciplinary volume, the first book on food pedagogies, develops innovative and theoretical perspectives to problematize the practices of teaching and learning about food. While many different pedagogues, policy makers, churches, activists, health educators, schools, tourist agencies, chefs think we do not know enough about food and what to do with it, the aims, effects and politics of these pedagogies has been much less studied. Drawing on a range of international studies, diverse contexts, genres and different methods, this book provides new sites of investigation and lines of inquiry. As a result of its broad ranging critical evaluation of food as classroom and food as teacher, it provides theoretical resources for opening up the concept of pedagogy and assessing the moralities and politics of teaching and learning about food in the classroom and beyond.
