Chemistry Paper- II

PART II - CHEMISTRY

SECTION - 1 : (One or more options correct Type)

This section contains 8 multiple choice questions. Each question has four choices (A), (B), (C) and (D) out of which **One or more** are correct.

21. After completion of the reactions (I and II), the organic compound(s) in the reaction mixtures is (are)

Reaction I :

Reaction II :

- (A) Reaction I : P and Reaction II : P
 (B) Reaction I : U, acetone and Reaction II : Q, acetone
 (C) Reaction I : T, U, acetone and Reaction II : P
 (D) Reaction I : R, acetone and Reaction II : S, acetone

21. (C) $\text{CH}_3-\overset{\text{O}}{\text{C}}-\text{CH}_2-\text{CH}_2\text{Br} \xrightarrow{\text{NaOH}} \text{CH}_3-\overset{\text{O}}{\text{C}}-\text{CH}_2\text{Br} \xrightarrow{\text{NaOH}} \text{CH}_3-\overset{\text{O}}{\text{C}}-\text{CH}_2\text{CN} \xrightarrow{\text{NaOH}} \text{CH}_3-\overset{\text{O}}{\text{C}}-\text{CH}_2\text{CN} \xrightarrow{\text{NaOH}} \text{CH}_3-\overset{\text{O}}{\text{C}}-\text{CH}_2\text{CN} + \text{CH}_3\text{CH}_2-\overset{\text{O}}{\text{C}}-\text{CH}_2\text{CN}$
 In base catalysed reaction the rate of reaction is faster.

Production Chemicals for the Oil and Gas Industry, Second Edition Malcolm A. Kelland, 2014-03-13 Production chemistry issues result from changes in well stream fluids both liquid and gaseous during processing Since crude oil production is characterized by variable production rates and unpredictable changes to the nature of the produced fluids it is essential for production chemists to have a range of chemical additives available for rectifying issues that would not otherwise be fully resolved Modern production methods the need to upgrade crude oils of variable quality and environmental constraints demand chemical solutions Thus oilfield production chemicals are necessary to overcome or minimize the effects of the production chemistry problems Production Chemicals for the Oil and Gas Industry Second Edition discusses a wide variety of production chemicals used by the oil and gas industry for down hole and topside applications both onshore and offshore Incorporating the large amount of research and applications since the first edition this new edition reviews all past and present classes of production chemicals providing numerous difficult to obtain references especially SPE papers and patents Unlike other texts that focus on how products perform in the field this book focuses on the specific structures of chemicals that are known to deliver the required or desired performance information that is very useful for research and development Each updated chapter begins by introducing a problem such as scale or corrosion for which there is a production chemical The author then briefly discusses all chemical and nonchemical methods to treat the problem and provides in depth descriptions of the structural classes of relevant production chemicals He also mentions when available the environmental properties of chemicals and whether the chemical or technique has been successfully used in the field This edition includes two new chapters and nearly 50 percent more references

The Local Configuration of New Research Fields Martina Merz, Philippe Sormani, 2015-10-27 This new Yearbook addresses the question of how policy place and organization are made to matter for a new research field to emerge Bringing together leading historians sociologists and organizational researchers on science and technology the volume answers this question by offering in depth case studies and comparative perspectives on multiple research fields in their nascent stage including molecular biology and materials science nanotechnology and synthetic biology The Yearbook brings to bear the lessons of constructivist ethnography and the practice turn in Science and Technology Studies STS more broadly on the qualitative comparative and critical inquiry of new research fields In doing so it offers unprecedented insights into the complex interplay of national research policies regional clusters particular research institutions and novel research practices in and for any emerging field of techno science It systematically investigates national and regional differences including the variable mobilization of such differences and probes them for organizational topicality and policy relevance

The Patient Will See You Now Eric Topol, 2016-10-25 The essential guide by one of America's leading doctors to how digital technology enables all of us to take charge of our health A trip to the doctor is

almost a guarantee of misery You ll make an appointment months in advance You ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes Then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves And your bill will be astronomical In The Patient Will See You Now Eric Topol one of the nation s top physicians shows why medicine does not have to be that way Instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system The change is powered by what Topol calls medicine s Gutenberg moment Much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare With smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best Medicine has been digitized Topol argues now it will be democratized Computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable Massive open online medicine where diagnostics are done by Facebook like comparisons of medical profiles will enable real time real world research on massive populations There s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy Nevertheless the result better cheaper and more human health care will be worth it Provocative and engrossing The Patient Will See You Now is essential reading for anyone who thinks they deserve better health care That is for all of us

The Structures of Practical Knowledge Matteo Valleriani, 2017-02-20 The Structures of Practical Knowledge investigates the nature of practical knowledge why how when and by whom it is codified and once codified how this knowledge is structured The inquiry unfolds in a series of fifteen case studies which range in focus from early modern Italy to eighteenth century China At the heart of each study is a shared definition of practical knowledge that is knowledge needed to obtain a certain outcome whether that be an artistic or mechanical artifact a healing practice or a mathematical result While the content of practical knowledge is widely variable this study shows that all practical knowledge is formally equivalent in following a defined workflow as reflected in a construction procedure a recipe or an algorithm As explored in the volume s fifteen contributions there are three levels at which structures of practical knowledge may be understood and examined At the most immediate level there are the individual workflows that encompasses practical knowledge itself Probing further it is possible to examine the structure of practical knowledge as it is externalized and codified in texts drawings and artifacts

such as models Finally practical knowledge is also related to social structures which fundamentally determine its dissemination and evolution into new knowledge structures The social structures of professionals and institutions represent the critical means by which practical knowledge takes form These actors are the agents of codification and by means of selection appropriation investment and knowledge development they determine the formation of new structures of practical knowledge On a more abstract level the creation of new knowledge structures is understood as constituting the basis for the further development of scientific knowledge Rich in subject matter and incisive in the theory it lays out this volume represents an important contribution to the history of science and epistemology Individually the fifteen case studies encompassing the history of architecture mining brewing glass production printing ballistics mechanics cartography cosmology and astronomy are replete with original research and offer new insights into the history of science Taken together the contributions remodel historical epistemology as a whole elucidating the underlining knowledge structures that transcend disciplinary boundaries and that unite practitioners across time and space The Leather Manufacturer ,1932
