

PARAMETER LIST

Parameters are constants and various data required for setting machines and NC equipment operation modes required for machining. When machines are delivered, parameters are set at factory. Some of them can be changed by the user.

If wrong values are set as parameter, operation of machines and NC equipment may be hampered. For changing parameters, their meaning and functions must be well understood.

This parameter list shows important parameters for the user. Those which the user hardly need change settings and those not used are omitted from the list. The meaning and functions of parameters are described in the right hand side column on the list.

If functions of parameters to be changed are not clearly understood, contact our service centers.

How to Use Parameter List

The parameters are listed in a form as shown below.

Advanced Manufacturing Processes VI Volodymyr Tonkonogyi, Vitalii Ivanov, Justyna Trojanowska, Gennadii Oborskyi, 2025-02-13 This book offers a timely snapshot of innovative research and developments at the interface between design manufacturing materials mechanical and process engineering and quality assurance It covers various manufacturing processes such as grinding turning drilling milling broaching and gear machining including additive manufacturing strengthening electro mechanical processing vacuum technology and deforming broaching It focuses on computer and numerical simulation mathematical and reliability modeling and machine learning models for manufacturing systems and processes It describes innovative cutting and abrasive processes and combined technologies It also investigates the electrical resistance self sharpening effect strengthening heat treatment surface peening and heat resistance of various coatings and materials Gathering the best papers presented at the 6th Grabchenko s International Conference on Advanced Manufacturing Processes InterPartner 2024 held in Odesa Ukraine on September 10 13 2024 this book provides a comprehensive and up to date examination of design manufacturing mechanical materials and process engineering as well as quality assurance trends and technologies It also aims to foster international and interdisciplinary communication and collaborations offering a bridge between the academic and industrial sectors *Handbook of Preformulation* Sarfaraz K. Niazi, 2019-03-22 Preformulation studies are the physical chemical and biological studies needed to characterize a drug substance for enabling the proper design of a drug product whereas the effectiveness of a drug product is determined during the formulation studies phase Though the two disciplines overlap in practice each is a significantly distinct phase of new drug development Entirely focused on preformulation principles this fully revised and updated Handbook of Preformulation Chemical Biological and Botanical Drugs Second Edition provides detailed descriptions of preformulation methodologies gives a state of the art description of each technique and lists the currently available tools useful in providing a comprehensive characterization of a new drug entity Features Addresses the preformulation studies of three different types of new active entities chemical biological and botanical which is the latest established class of active ingredient classified by the FDA Illustrates the activities comprised in preformulation studies and establishes a method of tasking for drug development projects Includes extensive flow charts for characterization decision making Gives extensive theoretical treatment of principles important for testing dissolution solubility stability and solid state characterization Includes over 50% new material **Programming of Computer Numerically Controlled Machines** Kenneth W. Evans, 2007 With its wide range of data about the selection of tools cutting speeds and the technology of machining this book would be a handy on the job reference for engineers programmers supervisors and machine operators besides serving as a proven and effective textbook for anyone learning CNC programming for the first time **BOOK JACKET Basics of CNC Programming** Pawan Negi, Mangey Ram, Om Prakash Yadav, 2022-09-01 Before the introduction of automatic machines and automation industrial

manufacturing of machines and their parts for the key industries were made though manually operated machines. Due to this, manufacturers could not make complex profiles or shapes with high accuracy. As a result, the production rate tended to be slow, production costs were very high, rejection rates were high, and manufacturers often could not complete tasks on time. Industry was boosted by the introduction of the semi-automatic manufacturing machine known as the NC machine, which was introduced in the 1950s at the Massachusetts Institute of Technology in the USA. After these NC machines started to be used, typical profiles and complex shapes could get produced more readily, which in turn led to an improved production rate with higher accuracy. Thereafter, in the 1970s, an even larger revolutionary change was introduced to manufacturing, namely the use of the CNC machine, Computer Numerical Control. Since then, CNC has become the dominant production method in most manufacturing industries, including automotive, aviation, defence, oil and gas, medical, electronics, industry, and the optical industry. Basics of CNC Programming describes how to design CNC programs and what cutting parameters are required to make a good manufacturing program. The authors explain about cutting parameters in CNC machines, such as cutting feed, depth of cut, rpm, cutting speed, etc., and they also explain the G codes and M codes, which are common to CNC. The skill set of CNC program writing is covered, as well as how to cut material during different operations like straight turning, step turning, taper turning, drilling, chamfering, radius profile, profile turning, etc. In so doing, the authors cover the level of CNC programming from basic to industrial format. Drawings and CNC programs to practice on are also included for the reader.

amount of new knowledge every day. We have to acknowledge that even the smartest people among us are incapable of familiarizing himself with all these new data. Fortunately, we are only required to deal with a very small amount of that vast number in our work and life. As those who devote himself to the field of information technology and management engineering, I sincerely believe that it is our responsibility to make efforts to accelerate the advance of science in such fields. The 2014 international Conference on Information Technology and Management Engineering, thanks to the hard work of its committee, will be held on April 26 and 27 in Hong Kong. The ITME2014 covers a wide range of topics, such as network protocols, information theory, and coding theory, network security, management theory, project management, public management, knowledge management, etc. It is a great honor to us that numerous people from various countries, including many famous experts and excellent researchers, have shown their interest in this convention and submitted their latest studies to us as their support. Among these studies, we have selected about a hundred to be finally included in this proceeding after reviewing and discussing. We believe that this collection of work will be of great value, not only to the participants of ITME2014 but also to those who have a chance of meeting it. The publication of this conference proceedings and the successful opening of ITME2014 owe its credit to a lot of people and institutions, especially the ITME2014 committee, the editors, and DEStech Publications. The committee has devoted much time to reviewing the papers submitted to ITME2014, and DEStech Publications publishing those accepted papers. I

would like to thank the committee and the press deeply here for their support to ITME2014 and I am eagerly looking forward to another chance for us to be a team again Finally let s wish together that the 2014 International Conference on Information Technology

The Foundryman ,1988 **Structural Integrity and Monitoring for Composite Materials** Ahmad Hamdan Ariffin,Noradila Abdul Latif,Muhammad Faisal bin Mahmud,Zaleha Binti Mohamad,2023-01-27 The book focuses on the recent technology and advancement in structural integrity and monitoring systems in composite materials Composites have been widely used in automotive aerospace and wind turbine industries therefore it is important to develop state of the art technology to monitor and manage the damage tolerance and durability This book explores the challenge of a monitoring system in a composite and presents a real time system which has advantages for damage detection localization assessment and life prediction compared to the Non Destructive Testing NDT It will also present the modelling and prediction of failure in a composite material based on computational analysis of the characteristics and properties of the composite material based on fiber and matrix properties This book will benefit lecturers students researchers engineers and industrialist who are working in the civil mechanical engineering automotive aerospace and wind turbine industries **The Foundry Trade Journal** ,1987 *Metals and Materials* ,1988 **Limited Scientific and Technical Aerospace Reports** ,1972
