License to Spill Rachel Plotnick, 2025-04-29 How everyday wetness, from finger smudges, sweat, and spilled drinks to showering and swimming, collides with consumers' media devices designed to stay dry. *License to Spill* investigates the everyday moments, activities, and spaces where media technologies and liquids collide, from disastrous spilled drinks that corrode laptops and drops in the toilet that drown smartphones to the greasy finger smudges and sweat droplets that sully screens and glitch smartwatches. Putting historical and present-day case studies in conversation, Rachel Plotnick considers how people's

experiences with media devices inevitably encounter wetness and yet consumers not the companies who make the devices take the blame when leaks spillages and overflows occur Along with thinking about preventive measures and device caretaking License to Spill examines how water resistant and waterproofed technologies through their design and marketing imagine the brawniest and hardest of users meant to punish and abuse their tough devices granting them unfettered permission to get wet Examining a long history of torture testing and hyperbolic claims of imperviousness the book demonstrates how protective designs relate to broader cultural ideas about media use as sporty luxurious excessive or messy This context is especially relevant given that the market for water resistant bags cases coatings and seals has flourished over the past decade with new rhetoric about wetness as natural and digital technologies as ever present The book pushes us to attend to both the ideals and problems that arise when designing resilient devices ranging from the right to repair movement and lawsuits over ingress protection IP ratings to obsolescence culture and work from home activities in the wake of the COVID 19 pandemic CompTIA Mobility+ Certification All-in-One Exam Guide (Exam MB0-001) Bobby E.
