False Prophets Richard Bonney, 2008 After 9 11 the US response to Al Qaeda the Global War on Terror was heavily influenced by the clash of civilizations theory This book identifies the twenty first century proponents of the thesis such as Bernard Lewis and Daniel Pipes their links to the Bush government and their roles in exploiting hostility between the West and Islam

Before and After 9/11 Tom Rockmore, 2011-04-21 This clearly written and accessible work

presents a philosopher's response to the series of events known as 9/11 and the global culture in the United States and global society that followed. It provides a comprehensive analysis of the emerging post 9/11 culture situating it in a broad context that includes politics, religious discourse, economic theory, and philosophical orientation. Before and After 9/11 reconstructs the events that led to and departed from the attacks on September 11, 2001. It criticizes the attempts to explain 9/11 by George W. Bush, his administration's neo-conservatives, Samuel Huntington, and Bernard Lewis. It also pays particular attention to the importance of the economic dimension in the emergence of conflicts in an age of globalization. The aim is to provide a philosophical overview of 9/11 understood as a series of connected events within an ongoing historical context. This unique work will appeal to anyone seeking to understand the current world including the ongoing wars in Iraq and Afghanistan.

American Conservatism Paul Lyons, 2009. This book offers a rare opportunity to read about how a scholar's teaching informs his research in this case, an examination of the nature of American conservatism. It is based on an interdisciplinary senior seminar Lyons taught in Spring 2006. His teaching log, including student comments from an electronic conferencing system, gives a vivid sense of the daily frustrations and triumphs. Lyons reflects on some of the most difficult issues in higher education today, such as how to handle racism and political passions in the classroom, as well as how a teacher presents his own political convictions. Lyons begins with the premise that most universities have been negligent in helping undergraduates understand a movement that has shaped the political landscape for half a century. In addition, in a series of essays that frame the teaching log, he makes the case that conservatives have too often failed to adhere to basic Burkean principles and that the best of conservatism has often appeared as a form of liberalism from thinkers such as Hannah Arendt, Reinhold Niebuhr, and George Kennan. The essays also cover the history of conservatism, conservative use of the city on a hill metaphor, and an examination of how the promise of Camelot sophistication was subverted by a resurgence of right-wing populism.
