Popular Music in France from Chanson to Techno Hugh Dauncey, 2017-07-05 In France during the 1960s and 1970s popular music became a key component of socio cultural modernisation as the music record industry became increasingly important in both economic and cultural terms in response to demographic changes and the rise of the modern media As France began questioning traditional ways of understanding politics and culture before and after May 1968 music as popular culture became an integral part of burgeoning media activity Press radio and television developed free from de Gaulle's state domination of information and political activism shifted its concerns to the use of regional languages and regional cultures including the safeguard of traditional popular music against the centralising tendencies of the Republican state The cultural and political significance of French music was again revealed in the 1990s as French language music became a highly visible example of France's quest to maintain her cultural exceptionalism in the face of the perceived globalising hegemony of English and US business and cultural imperialism Laws were passed instituting minimum quotas of French language music The 1980s and 1990s witnessed developing issues raised by new technologies as compact discs the minitel telematics system the internet and other innovations in radio and television broadcasting posed new challenges to musicians and the music industry These trends and developments are the subject of this volume of essays by leading scholars across a range of disciplines including French studies musicology cultural and media studies and film studies It constitutes the first attempt to provide a complete and up to date overview of the place of popular music in modern France and the reception of French popular music abroad
