Journal Of The International History Of Islamic Medicine:

The Routledge Handbook of the History of the Middle East Mandates Cyrus Schayegh, Andrew Arsan, 2015-06-05 The Routledge Handbook of the History of the Middle East Mandates provides an overview of the social political economic and cultural histories of the Middle East in the decades between the end of the First World War and the late 1940s when Britain and France abandoned their Mandates It also situates the history of the Mandates in their wider imperial international and global contexts incorporating them into broader narratives of the interwar decades In 27 thematically organised chapters the volume looks at various aspects of the Mandates such as The impact of the First World War and the development of a new state system The impact of the League of Nations and international governance Differing historical perspectives on the impact of the Mandates system Techniques and practices of government The political social economic and cultural experiences of the people living in and connected to the Mandates This book provides the reader with a guide to both the history of the Middle East Mandates and their complex relation with the broader structures of imperial and international life It will be a valuable resource for all scholars of this period of Middle Eastern and world history CONTEXTUALISING ISLAM IN PSYCHOLOGICAL RESEARCH (IIUM PRESS) Mariam Adawiyah Dzulkifli, Nor Diana Mohd Mahudin, 2021-03-10 This book is intended to present a compilation of research that has incorporated the Islamic philosophical theoretical and historical perspective with the concepts theories and methods in psychology While the relationship between Islam research and psychology has been studied previously the effort to incorporate integrate and use Islamic resources to examine phenomena related to psychology through rigorous scientific methods has been found to be lacking among Muslim researchers The present book therefore is an attempt to meet this need by incorporating the Islamic perspective in the conduct of research in psychology It is also an attempt to contextualize Islam in the current efforts in research on psychology so that we can better understand the religion both as an established way of life and as a model of scientific inquiry Finally the remaining chapters are dedicated to the discussion of the conceptual and strategic way forward for research in specific areas of psychology In doing so both the rationale and practicalities of incorporating integrating and utilizing Islamic resources in research on psychology have been provided *The Oxford Handbook of the History of Psychology: Global Perspectives* David B. Baker, 2012 The science and practice of psychology has evolved around the world on different trajectories and timelines yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others but in today's global culture there is a greater need in psychology for international understanding This volume describes the historical development of psychology in countries throughout the world Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations psychologies Each unique story adds another element to our understanding of the history of psychology The chapters in this

volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives Making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight as well as a better understanding of the human condition A History of Muslims, Christians, and Jews in the Middle East Heather J. Sharkey, 2017-04-03 This book traces the history of conflict and contact between Muslims Christians and Jews in the Ottoman Middle East prior to 1914 Islamophobia Stephen Sheehi, 2010-12-03 Islamophobia The Ideological Campaign Against Muslims examines the rise of anti Muslim and anti Arab sentiments in the West following the end of the Cold War through GW Bush s War on Terror to the Age of Obama Using Operation Desert Storm as a watershed moment Stephen Sheehi examines the increased mainstreaming of Muslim bating rhetoric and explicitly racist legislation police surveillance witch trials and discriminatory policies towards Muslims in North America and abroad The book focuses on the various genres and modalities of Islamophobia from the works of rogue academics to the commentary by mainstream journalists to campaigns by political hacks and special interest groups Some featured Islamophobes are Bernard Lewis Fareed Zakaria Thomas Friedman David Horowitz Ayaan Hirsi Ali Irshad Manji George W Bush Dick Cheney John McCain Hilary Clinton and Barack Obama Their theories and opinions operate on an assumption that Muslims particularly Arab Muslims suffer from particular cultural lacuna that prevent their cultures from progress democracy and human rights While the assertion originated in the colonial era Sheehi demonstrates that it was refurbished as a viable explanation for Muslim resistance to economic and cultural globalization during the Clinton era Moreover the theory was honed into the empirical basis for an interventionist foreign policy and propaganda campaign during the Bush regime and continues to underlie Barack Obama s new internationalism If the assertions of media pundits and rogue academics became the basis for White House foreign policy Sheehi also demonstrates how they were translated into a sustained domestic policy of racial profiling and Muslim baiting by agencies from Homeland Security to the Department of Justice Furthermore Sheehi examines the collusion between non governmental agencies activist groups and lobbies and local state and federal agencies to in suppressing political speech on US campuses critical of racial profiling US foreign policy in the Middle East and Israel While much of the direct violence against Muslims on American streets shops and campuses has subsided Islamophobia runs throughout the Obama administration Sheehi therefore concludes that Muslim and Arab hating emanate from all corners of the American political and cultural spectrum serving poignant ideological functions Islamic Psychology G.
