M. Solomon,M. Ciment,R. E. Ferguson,J. B. Bell,A. B Wardlaw (Jr),1977 A comprehensive computational procedure is presented for predicting the supersonic region of the flow field on advanced reentry vehicle shapes in steady flight at pitch and yaw The procedure utilizes explicit second order accurate finite difference methods applied to the conservation law form of the steady inviscid flow equations Improved numerical methods are used at the body surface and the bow shock wave Provisions for treating body geometries with discontinuous slopes are also included Either perfect gas or real gas equilibrium thermodynamic properties can be used The computational procedure is implemented as a FORTRAN computer code which provides a practicable representation of the inviscid flow field and the resulting aerodynamic force and moment on the vehicle In this report Vol I the analytical and numerical development of the procedure is presented and the associated computer code is described A comparison report Vol II User s Manual contains detailed instructions for operating the code and interpreting the output results Author

**Large Language Models for Developers** Oswald Campesato,2024-12-26 This book offers a thorough exploration of Large Language Models LLMs guiding developers through the evolving landscape of generative AI and equipping them with the skills to utilize LLMs in practical applications Designed for developers with a foundational understanding of machine learning this book covers essential topics such as prompt engineering techniques fine tuning methods attention mechanisms

and quantization strategies to optimize and deploy LLMs Beginning with an introduction to generative AI the book explains distinctions between conversational AI and generative models like GPT 4 and BERT laying the groundwork for prompt engineering Chapters 2 and 3 Some of the LLMs that are used for generating completions to prompts include Llama 3 1 405B Llama 3 GPT 4o Claude 3 Google Gemini and Meta AI Readers learn the art of creating effective prompts covering advanced methods like Chain of Thought CoT and Tree of Thought prompts As the book progresses it details fine tuning techniques Chapters 5 and 6 demonstrating how to customize LLMs for specific tasks through methods like LoRA and QLoRA and includes Python code samples for hands on learning Readers are also introduced to the transformer architecture s attention mechanism Chapter 8 with step by step guidance on implementing self attention layers For developers aiming to optimize LLM performance the book concludes with quantization techniques Chapters 9 and 10 exploring strategies like dynamic quantization and probabilistic quantization which help reduce model size without sacrificing performance FEATURES Covers the full lifecycle of working with LLMs from model selection to deployment Includes code samples using practical Python code for implementing prompt engineering fine tuning and quantization Teaches readers to enhance model efficiency with advanced optimization techniques Includes companion files with code and images available from the publisher *Using Simply Accounting 2004* Mary Purbhoo,2005 *Soviet Engineering Research* ,1986 **Essentials of Nursing Critically Ill Adults** Samantha Freeman,Colin Steen,Gregory Bleakley,2021-09-01 An essential guide to critical care nursing that includes all the key scientific knowledge and procedures you will need to know when entering the critical care environment Written by a dedicated team of lecturers and practitioners with extensive experience in critical care nursing this textbook covers all the key elements involved in nursing critically ill adults with individual chapters on managing problems associated with different organ systems and the pathophysiology behind these disorders It also features coverage of psychological care and infection prevention and includes a consistent focus on the importance of a person centred evidence based approach to critical care delivery To further support your learning the book is full of activities that enhance your knowledge and test your understanding including clinical case studies critical thinking tasks and reflective practice exercises For lecturers and instructors there is a collection of online resources including a testbank of multiple choice questions links to relevant videos for each chapter and PowerPoint slides for each chapter The ideal textbook for nursing students studying critical care undertaking clinical placements in intensive care or nurses new to the critical care environment **International Coal Preparation Congress 2010 Conference Proceedings** Rick Q.
