Reflections: Discovering Life in the Universe

Descriptions: This questionnaire is designed as a guide checklist of whether a student has actually mastered the performance-ideas for this chapter. It should be noted if they have. Keep in mind that these items refer to a *task* associated to selected topics from the chapter, intended to give insight that will lead to more in-depth study.

From [Google for image search](#): There's always the idea, especially you know the questions that follow: How can you find the most value in your work?

11. The gas particles inside a lower balloon, causing it to expand, will be moving at a fast (faster/slow).

Using that model of the balloon should not depend on size, the gas particles should still move faster. Thus, think about what would happen if the gas in the balloon were hot around the burner's flame, remembering that faster gas motion means higher temperature and that the burner jet is very sensitive to temperature.
