Design Unbound: Designing for Emergence in a White Water World, Volume 1 Ann M. Pendleton-Jullian, John Seely Brown, 2018-12-04 Tools for navigating today s hyper connected rapidly changing and radically contingent white water world Design Unbound presents a new tool set for having agency in the twenty first century in what the authors characterize as a white water world rapidly changing hyperconnected and radically contingent These are the tools of a new kind of practice that is the offspring of complexity science which gives us a new lens through which to view the world as entangled and emerging and architecture which is about designing contexts In such a practice design unbound from its material thingness is set free to design contexts as complex systems In a world where causality is systemic entangled in flux and often elusive we cannot design for absolute outcomes Instead we need to design for emergence Design Unbound not only makes this case through theory but also presents a set of tools to do so With case studies that range from a new kind of university to organizational and even societal transformation Design Unbound draws from a vast array of domains architecture science and technology philosophy cinema music literature and poetry even the military It is presented in five books bound as two volumes Different books within the larger system of books will resonate with different reading audiences from architects to people reconceiving higher education to the public policy or defense and intelligence communities The authors provide different entry points allowing readers to navigate their own pathways through the system of books and America's Culture of Innovation Narain D. Batra, 2013-10-18 This is a book about the dynamics of the aspirational society It explores the boundaries of permissible thought deviations and transgressions that create constant innovations When confronted with a problem an innovative mind struggles and brings forth something distinctive new ideas new inventions and new programs based on unconventional approaches to solve the problem But this can be done only if the culture creates large breathing spaces by leaving people alone not as a matter of state generosity but as something fundamental in being an American Consequently the Constitutional mandate of Congress shall make no law has encouraged fearless speech unrestrained thought and endless experimentation leading to newer developments in science technology the arts and not least socio political relations Most of all the First Freedoms liberate the mind from irrational fears and encourage an environment of divergent thinking non conformity and resistance to a collective mindset The First Freedoms encourage Americans to be iconoclastic to be creatively crazy to be impure thus enabling them to mix and re mix ideas to design new technologies and cultural forms and platforms anything from experimental social relations and big data explorations to electing our first black president Political Humor in a Changing Media Landscape Jody C Baumgartner, Amy B.
