

◆ Replacing Lubricant

Use same oil supply lubricant as before. Using this Rotary Table, Table 1 shows its oil capacity (approximate).
 Lubricant and capacity for the replacement procedure are as in the description during installation of the Rotary Table.

Supply (or drain) lubricant at the specified feed port (or drain port) shown in the above figure.
 Before supplying/drainning lubricant, check the location of each port with the Outline Drawing and the instruction plate attached to the Rotary Table.

[Procedures]

- 1) Closely follow the instructions described in "57 Safety Instructions" and "58 ◆ Dismounting the Rotary Table from the Machine Tool" (58-6).
- 2) Clean around the lubricant feed ports so that chips, dust, and other foreign matter may not become mixed with the lubricant.
 - * If any chip, dust, or foreign matter enters into the Rotary Table, it may interfere with the gears and cause seizure.
 - * With this Rotary Table, the main body and the gear case share the same lubricant, feed port and drain port.
