

Geometry of Circles

Students who successfully complete this primer will be able to:

- Calculate the area and circumference of a circle.
- Apply the relationship between the radius of a circle and an arc length.

Radius, radians, and arc length

In many physics applications, it is necessary to convert between the distance from the center of a circle, the radius r , and the distance along the circumference, called the arc length s . These two parameters are related by the angle θ swept out from the starting point of the arc, typically defined as the x -axis, and the end point ([Figure 1](#)).

Scientists and mathematicians typically measure the angle θ in radians rather than degrees, which is defined as

$$\theta(\text{radians}) = \frac{s}{r} \rightarrow s = r\theta$$

This second formula is another way to write the definition of circumference with s being an arc that comprises an entire circle and r being the radius of the circle. That means that 2π must be the angle of the entire circle:

$$\theta_{\text{full circle}} = 2\pi \text{ radians} = 360^\circ$$

In fact, the radius of a circle can be thought of as a conversion factor between the angular position θ and the arc length s :

$$1 \text{ radius} = 1 \text{ radius} \left(\frac{2\pi \text{ radians}}{1 \text{ full circle}} \right) = 2\pi \theta$$

[Click here](#) to watch a video that walks through the geometry of circles, including a worked-out example. Then answer the questions that follow.

Part C - Determining arc length

What is the length of an arc on a circle of radius 30.3 cm when $\theta = 60^\circ$?

Express your answer (in cm) to three significant figures.

• [Hint](#)

$s =$ cm

Our Sacred Source Andrew Kneier, 2021-01-05 Life is not a cakewalk for any of us We each have our individual sufferings and challenges in life and we each must endure vital questions that have no certain answers Why are we here Where is God when we need him How do our lives matter in the long run Our science cannot help us with such questions but theology can And that s what this book has to offer This book s theology is based on an arresting theory about God Turning to modern physics it finds God in the origin of the universe and in the innermost foundations of the natural world The universe flowed from his nature but his nature was not perfect which is why we have an imperfect world where bad things happen to good people And yet we also find this God deep within us enabling us to confront our suffering with resilience and grace The evil in the world has power but we have power too the power from our inner God to hold steady against the slings and arrows of our misfortunes The theology presented here builds on the discoveries of particle physics and quantum mechanics about the foundational building blocks and forces in all of creation These reveal the abounding spirit and purposes of the Creator a spirit that empowers us and instills in us purposes we can embrace and foster It may seem we are essentially on our own as we navigate through life but in this book s theology God is always and everywhere with us and in us
