This chapter discusses four ways that Geology benefits us. What are they? How do these benefits relate to Engineering applications?

What are the two "engines" that drive earth's processes, how do they work (basically) and what are their energy sources?

How do the "engines" influence and interact with the Earth Systems? (provide a couple of examples)

In "Environmental Geology 1.1 – Delivering Oil – The Environment vs. the Economy", Geologists regarded much of the region that the Alaskan pipeline crossed as hazardous to the structure. What are some of the hazards noted, and what design features did the engineers use to minimize the impact of these hazards?

In "In Greater Depth 1.3 – Geology as a Career", what are some of the disciplines of Geology and what do they do?
