Word Problem All Educate School, 2017-11-06. Word Problems Grade 1 Three Addend Addition Word Problems 1st Grade Includes Bonus Enrichment Questions for Kindergarten 1st 2nd Grade. This pack includes 31 addition and subtraction word problems grade 1 designed for students to Read Along Sketch and Solve. The format is ideal for special education intervention groups or guided math groups. Each problem is presented in a full page format to give students enough space to investigate multiple ways to solve the problem. The word sketch is intentionally used on all pages. Before students begin work we often discuss how to represent objects using quick sketches as opposed to time consuming detailed pictures. These word problems for grade 1 are designed with the rigor of the Common Core in mind and support the following standards: CCSS Math Content K.OA.A.2 Solve addition and subtraction grade 1 math word problems and add and subtract within 10 e.g. by using objects or drawings to represent the problem. CCSS Math Content 1.OA.A.1 Use addition and subtraction within 20 to solve word problem grade 1 involving situations of adding to, taking from, putting together, taking apart and comparing with unknowns in all positions e.g. by using objects, drawings and equations with a symbol for the unknown number to represent the problem. These are beginning of the year first grade problems working within groups of ten. Each sheet includes: A place for students to sketch the problem. A ten frame for students to utilize. I encourage students to cross out items that are taken away as they work with the ten frame for subtraction. A number path on which students show their work. A space for an equation. A space to fill the answer in. Click on the preview to read why a number path is used instead of a number line. As I introduce the first few problems with a group we work through each section together and students complete each box on the sheet. Once students are familiar with the ways these sheets support their problem solving I often have each student choose at least 2 ways to show and check their work. This allows each student to utilize the methods that are most efficient for him/her. I love to give students time to discuss why they chose certain methods to solve a problem. Each sheet includes an extension bonus question at the bottom. These questions can be used in a variety of ways. Many parents want to help their child develop math concepts but are not sure how. These bonus questions are perfect extension
