## APPLICATION FOR ADMISSION FORM POSTDOCTORAL RESEARCH FELLOWSHIPS (PDRF)

### 1. INSTRUCTIONS

- 1.1 The application form (PDRF 2) must be completed electronically before it is signed and dated by the applicant.
- 1.2 The following documentation must be attached to the completed PDRF 2 form:
  - a) Copy of your curriculum vitae
  - b) Certified copy of your ID or Passport
  - c) Copy of your PhD certificate
  - d) Summary of your research proposal
- 1.3 The following criteria will be considered during the selection process:
  - a) At the time of the award, the applicant should have graduated no earlier than within the previous five (5) years.
  - b) South African citizens and permanent residents will have priority.
  - c) Relevant experience.
  - d) Publication record.
  - e) Applicants must be available for full-time research at MUT.

**Identification and clinical evaluation of senescence-associated markers to distinguish melanocytic nevi from melanomas** Kyriakos Orfanidis, 2019-12-19 Melanoma is a form of cancer that develops in melanocytes While it represents only 5% of skin malignancies it is the most aggressive and lethal Benign proliferation of these cells form the melanocytic nevi The definitive diagnosis of melanocytic nevi or melanoma lesions is histopathologic However it is estimated that a correct diagnosis is established by means of standard skin biopsy in only 83% of the melanocytic lesions of the remaining cases 8% and 9% are overinterpreted false positives and under interpreted false negatives respectively This underscores the importance of additional diagnostic tests Since cellular senescence is considered to be a tumor suppressive mechanism immuno histochemistry using senescence markers has been suggested for the evaluation of difficult melanocytic lesions however the routinely used senescence markers lack the ability to distinguish nevi from melanoma The general aim of this thesis is therefore to identify novel senescence markers that may aid in melanoma diagnosis In study I we established a cellular model with nevus mimicking characteristics consisting in primary melanocytes that become senescent Transcriptomic analysis allowed expanding the set of senescence associated markers that could distinguish nevi from melanoma and identifying tubulin 3 as a potential diagnostic marker Depletion of tubulin 3 and pretreatment with tubulin destabilizing drugs in melanocytes and melanoma cells induced a senescence like phenotype in vitro In particular reduced migration capacity and induction of cell cycle arrest in G2 M phase of the cell cycle was demonstrated In study II a potential inter cellular signaling pathway between melanoma cells and stromal fibroblasts that might facilitate melanoma invasion was investigated Ultraviolet UV radiation was shown both in melanoma cells and fibroblasts to promote the release and activation of TGF 1 and subsequent increase in expression of the serine protease FAP a protein that plays role in extracellular matrix degradation and therefore facilitates the invasion

of melanoma cells. Such mechanism was not functional in senescent melanocytes. In study III it was shown that tubulin 3 immunostaining aids in the diagnosis of nevi and melanomas. The diagnostic criterium was the tubulin 3 gradient within the melanocytic nevi that was no longer apparent in melanoma. Different patterns of tubulin 3 immunostaining in melanoma were described. Dermoscopy immunohistochemistry associations were found. Specific dermoscopic features highlighted and the prognostic value of this tubulin 3 marker was examined. The progression rate in patients whose melanomas had areas with loss of tubulin 3 was 4 times higher than in patients without this feature although statistical significance could not be reached  $p = 0.06$ . In conclusion transcriptomic analysis expanded the set of senescence associated markers that could distinguish nevi from melanoma and identified tubulin 3 as novel immunohistochemistry marker shown to have diagnostic and probably prognostic value. From a mechanistical point of view ultraviolet radiation was shown to promote not only the formation of melanoma but also its progression by increasing a cathepsin TGF- $\beta$ 1/FAP pathway resulting in extracellular matrix degradation.

Malignt melanom är en form av cancer som utvecklas i melanocyter, de celler i huden som bildar pigmentet melanin. Men om malignt melanom endast utgör 5% av alla hudcancer är den den mest aggressiva och dödliga. Godartad ansamling av melanocyter bildar en leverfläck eller ett sk. nevus. Vid minsta misstanke om melanom opereras nevet bort och analyseras i mikroskop. Det uppskattas dock att en korrekt diagnos fastställs endast i 83% av de bortopererade lesionerna. Av de återstående fallen är 8% vertolkade och 9% undertolkade. Detta understryker vikten av att förbättra melanomdiagnostik.

Melanocyter i nevi anses i motsats till melanom ha avtagande förmåga att föröka sig efter ett visst antal celldelningar på grund av cellldrande. Påvisande av cellldrande markörer skulle därför kunna förbättra diagnostiken av svårbedömda lesioner. De idag rutinmässigt använda cellldrande markörerna saknar dock förmåga att skilja nevi från melanom. Det vergripande syftet med denna avhandling var därför att försöka identifiera nya cellldrande markörer för att förbättra melanomdiagnostiken.

I studie I etablerade vi en cellmodell med nevus efterliknande egenskaper bestående av melanocyter som leder. Med genuttrycksanalys studerades cellldrande markörer som kunde skilja nevi från melanom. Proteinet tubulin 3 identifierades som en potentiell diagnostisk markör. Minskning av tubulin 3 och förbehandling med tubulin destabiliserande läkemedel i melanocyter visade sig inducera ett tillstånd som liknar cellldrandet. I studie II undersöktes en signalväg mellan melanomceller och fibroblaster som kan underlätta melanomcellers förmåga att infiltrera och aktivt förstöra omgivande vävnad. Fibroblaster är en typ av bindvävsceller i huden som tillverkar mjönet som finns mellan cellernas extracellulära matrix. Ultraviolett UV-strålning visade sig både i melanomceller och fibroblaster föröka signalvägen som resulterar i ökat proteinuttryck av FAP, ett protein som bidrar till nedbrytning av extracellulära matrix vilket kan underlätta infiltration av melanomceller. En sådan signalväg var inte funktionell i ldrande melanocyter. I studie III visade vi att proteinet tubulin 3 är en markör som underlättar diagnostik av nevi respektive melanom. Det diagnostiska kriteriet var tubulin 3 gradienten som kunde ses i nevi men som ej var synligt i melanom. Olika mönster av tubulin 3 analys i melanom beskrevs. Kliniska associationer hittades och visade att denna markör för att förutsäga

sjukdomens förlopp undersökte Melanompatienter vars melanom hade omringats med förlust av tubulin 3 hade fyra gånger högre progressionstakt av sjukdomen jämfört med patienter utan detta mätster Sammanfattningsvis studerade vi celllådor som kunde skilja nevi från melanom och vi identifierade proteinet tubulin 3 som en markör med diagnostiskt och förmodligen prognostiskt värde Vi visade att ultraviolett strålning inte bara förklarar melanombildning utan också dess progression genom att skapa en signalväg mellan melanomceller och fibroblaster som resulterar i extracellulär matrixnedbrytning *Protein Export and Secretion Among Bacterial Pathogens* Sophie Bleves,Romé Voulhoux,Bérengère Ize,Thibault Géry Sana,Denise Monack,2020-02-27

**Vitamin B12** Rima Obeid,2017-07-12 Cobalamin vitamin B12 was discovered in the first half of the 20th century Vast amount of information on the role of the vitamins in human health and disease became available Cobalamin science was however based on theoretical concepts that have been accepted without further proof of facts and hypotheses Recently the breath taking pace of development in research technologies has changed our understanding for the role of nutrients and the complex interaction between diet environment and diseases Conditions like aging diet and drugs increase the risk of developing cobalamin deficiency probably because of diminished ability to liberate absorb or distribute the food derived vitamin From a basic science point of view understanding of the transport and function of the vitamin may pave the road for using this system for drug delivery This book represents up to date literature on the discoveries and developments in the field of cobalamin It includes multifaceted aspects of the vitamin in health and disease conditions The book has been written by leading scientists who have significant contributions in this field and represents therefore a timely unique encyclopaedia on cobalamin [Chemoinformatics Approaches to Structure- and Ligand-Based Drug Design](#) Adriano D. ## Mut Forms 2015 Introduction

In today's digital age, the availability of Mut Forms 2015 books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Mut Forms 2015 books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Mut Forms 2015 books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Mut Forms 2015 versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Mut Forms 2015 books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Mut Forms 2015 books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Mut Forms 2015 books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Mut Forms 2015 books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient

means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Mut Forms 2015 books and manuals for download and embark on your journey of knowledge?
