Keiter,2008-10-01 As the twenty first century dawns public land policy is entering a new era This timely book examines the historical scientific political legal and institutional developments that are changing management priorities and policies developments that compel us to view the public lands as an integrated ecological entity and a key biodiversity stronghold Once the background is set each chapter opens with a specific natural resource controversy ranging from the Pacific

Northwest's spotted owl imbroglio to the struggle over southern Utah's Colorado Plateau country Robert Keiter uses these case histories to analyze the ideas forces and institutions that are both fomenting and retarding change Although Congress has the final say in how the public domain is managed the public land agencies federal courts and western communities are each playing important roles in the transformation to an ecological management regime At the same time a newly emergent and homegrown collaborative process movement has given the public land constituencies a greater role in administering these lands Arguing that we must integrate the new imperatives of ecosystem science with our devolutionary political tendencies Keiter outlines a coherent new approach to natural resources policy
