George,Lisa Berger,2013-05-07 Free yourself from emotional turmoil even when that turmoil is caused by others We have a much greater understanding of human behavior now than we did just a few decades ago Yet even with this greater understanding of the human mind why we do what we do can sometimes seem like a mystery People are often left with unsettling questions about their own or others behavior We ask ourselves Why did I make a spectacle of myself Why am I so stressed Why am I constantly so negative In his years as a clinician Dr Ted George has been struck by how much easier it is for people to say they have a physical illness than it is to admit they feel out of control with an emotion be it anger fear or depression With a physical issue you have the source of the problem in concrete terms such as in a lab report but with an emotional issue it can be much harder to define what's gone wrong *Untangling the Mind* helps make sense of what's happening and why With knowledge of how the brain translates sensory signals into emotions you will increase your understanding of your own and others behaviors As you learn about your psychological and neurological makeup you will begin to see new possibilities for optimism motivation and well being We can control our behavior and our feelings no matter how much they may have ruled us in the past and Dr George helps us know how Once you understand the deeply rooted instincts that activate your emotions you can live more peacefully behave in ways that are more in keeping with the person you'd like to be and enjoy your life more fully And you'll be better able to remain unaffected by the drama of other people's emotional storms     **South Asian Handbook, 1992** Prentice Hall,1991-11 The popular handbooks series expands into a
