

motorola Portable Bluetooth® Hands-Free Speaker

MOTOSTART

Get connected in 4 quick steps.

T305

BEFORE YOU BEGIN

Before using this product, read the Important Safety and Legal Information pamphlet and follow its instructions.

Take a moment before you get started to familiarize yourself with your new T305 Portable Bluetooth Hands-Free Speaker.

① CHARGE YOUR HANDS-FREE SPEAKER

Charge your hands-free speaker's battery for 2 hours:

Note: Do not place hands-free speaker with clip installed on visor when charging.

- 1 Plug the Motorola charger into the charging port on the end of the hands-free speaker.

The indicator light turns steadily red when the battery is charging and the hands-free speaker is turned off. It may take up to 1 minute for the indicator light to turn on. When the hands-free speaker's battery is fully charged (about 2 hours), the indicator light turns steadily blue.

- 2 Disconnect the charger.

Note: Hands-free speaker is functional while charging; however, when charging the hands-free speaker while turned on, the indicator light does not provide charging status.

② START BLUETOOTH FEATURE

Your Phone

Your phone's Bluetooth feature is off by default. To use your hands-free speaker, you must turn on the Bluetooth feature in your phone.

For most Motorola phones (at the main menu):

- 1 Press **[M]** (Menu) > **Settings** > **Connection** > **Bluetooth Link** > **Setup**.
- 2 Scroll to **Power**.
- 3 Select **Change**.
- 4 Scroll to **On**.
- 5 Press **Select** to turn on the Bluetooth feature. The Bluetooth feature remains on until you turn the feature off.

Note: These steps are for most Motorola phones. For other phones, see your phone's user's guide.

Hordeski, 1995 A comprehensive reference on PC interfacing that takes readers step by step through general purpose input output analog to digital interfaces and digital to analog interfaces for connecting different types of external hardware such as switches lamps LEDs relays solenoids digital circuits and motors It contains everything necessary to create an effective interface using easily obtained products as well as how to make it work how to test it and how to troubleshoot problems Annotation copyright by Book News Inc Portland OR

Embedded Computing Joseph A. Fisher, Paolo Faraboschi, 2005 Embedded Computing is enthralling in its clarity and exhilarating in its scope If the technology you are working on is associated with VLIWs or embedded computing then clearly it is imperative that you read this book If you are involved in computer system design or programming you must still read this book because it will take you to places where the views are spectacular You don't necessarily have to agree with every point the authors make but you will understand what they are trying to say and they will make you think From the Foreword by Robert Colwell R E Colwell Assoc Inc The fact that there are more embedded computers than general purpose computers and that we are impacted by hundreds of them every day is no longer news What is news is that their increasing performance requirements complexity and capabilities demand a new approach to their design Fisher Faraboschi and Young describe a new age of embedded computing design in which the processor is central making the approach radically distinct from contemporary practices of embedded systems design They demonstrate why it is essential to take a computing centric and system design approach to the traditional elements of nonprogrammable components peripherals interconnects and buses These elements must be unified in a system design with high performance processor architectures microarchitectures and compilers and with the compilation tools debuggers and simulators needed for application development In this landmark text the authors apply their expertise in highly interdisciplinary hardware software development and VLIW processors to illustrate this change in embedded computing VLIW architectures have long been a popular choice in embedded systems design and while VLIW is a running theme throughout the book embedded computing is the core topic Embedded Computing
