La Fabrique Des Derniers Hommes:

La fabrique des derniers hommes Aurélien Berlan, 2012 La 4e de couverture indique Curieuse époque que la nôtre où le progrès la transformation des conditions de vie liées aux applications sociales de la science n'a jamais été aussi rapide mais où seuls quelques idéologues croient encore que nos enfants auront une vie meilleure Car les crises économiques sociales et écologiques s'accumulent sans fin Ce paradoxe est clair si l'on revient à l'aube de notre temps l'époque où le capitalisme industriel l'état bureaucratique et la science organisée se sont brutalement mis en place et aux diagnostics historiques de ceux qui ont cherché à saisir les implications pour la vie humaine Max Weber Georg Simmel et Ferdinand Tönnies ont identifié avec une lucidité implacable les pathologies constitutives de notre époque la marchandisation générale l'érosion du lien social la perte de sens et de liberté les prises d'emprise des organisations bureaucratiques Tout l'intérêt de leur sociologie est d'analyser ces évolutions en se demandant concrètement quel monde elles créent et quels types d'être humain elles engendrent Ce faisant ils mettent en évidence des aspects de la modernité capitaliste en général n'agissant car trop intimement liées à ce qu'elle a fait de nous Grâce à ce détour on pourra se défendre des illusions véhiculées par ceux qui continuent de prôner malgré tout les vertus de la croissance et du développement industriel ou qui annoncent que nous serions enfin sur le point d'atteindre la société postindustrielle Telle est la condition pour être la hauteur des tâches qui incombent aujourd'hui celles et ceux qui n'ont pas renoncé à l'idée d'émancipation

Beyond the Timeline: Resetting Historiography Julia Seeberger, Sabine Schmolinsky, Markus Vinzent, 2024-10-21 Different from literary works prose drama etc with techniques like montage and contemporary media film documentaries video games internet where time lines are being questioned through flashbacks and flashwords historiography seems to have resisted such challenges Most historiographical works biographies scholarly studies still adhere to chronological narratives even though the boundaries between history and literary fiction have been blurred over the past decades Responding to 20th 21st century attempts like Walter Benjamin's prophetic historian this volume asks How to write history without following the chronologically oriented trajectory of time The interdisciplinary contributions from a broad range of history medieval modern music sciences sociology life sciences genocide research go back to a symposium that responded to a publication of Markus Vinzent *Writing the History of Early Christianity From Reception to Retrospection* of 2019 Cambridge University Press The scholars engage with the idea of retrospection as a method of critical historiography Writing retrospectively is not simply a matter of presentism reversing chronology it disrupts continuities and teleologies and opens creative futures

Enrichment Luc Boltanski, Arnaud Esquerre, 2020-04-22 This book offers a major new account of modern capitalism and of the ways in which value and wealth are created today Boltanski and Esquerre argue that capitalism in the West has recently undergone a fundamental transformation characterized by deindustrialization on the one hand and on the other by the increased exploitation of certain resources that while not entirely new have taken on unprecedented importance It is this new form of exploitation that has given rise to what they call the enrichment economy The enrichment economy is based less

on the production of new objects and more on the enrichment of things and places that already exist It has grown out of a combination of many different activities and phenomena all of which involve in their varying ways the exploitation of the past The enrichment economy draws upon the trade in things that are intended above all for the wealthy thus providing a supplementary source of enrichment for the wealthy people who deal in these things and exacerbating income inequality As opportunities to profit from the exploitation of industrial labour began to diminish capitalism shifted its focus to expand the range of things that could be exploited This gave rise to a plurality of different forms for making things valuable valuing objects in terms of their properties is only one such form The form that plays a central role in the enrichment economy is what the authors call the collection form which values objects based on the gap they fill in a collection This valuation process relies on the creation of narratives which enrich commodities This wide ranging and highly original work makes a major contribution to our understanding of contemporary societies and of how capitalism is changing today It will be of great value to students and scholars in sociology political economy and cultural studies as well as to anyone interested in the social and economic transformations shaping our world

Political Illusion and Reality David W. Gill, David Lovekin, 2018-09-27 Are all governments east and west Muslim and secular authoritarian and constitutional Republican and Democratic fundamentally the same all of them under the extraordinary growing power of technique and bureaucracy Is all politics then just an illusory affair of lies deception propaganda partisan passions and chaos on the surface of government and party In his vast and penetrating writings Bordeaux sociologist Jacques Ellul 1912 1994 points in those directions Political Illusion and Reality is a collection of twenty three essays on Ellul's political thought Veteran as well as younger Ellul scholars political leaders activists and pastors discuss aspects of Ellul's thought as they relate to their own fields of study and political experience Beginning with his 1936 essay Fascism Son of Liberalism translated and published here in English for the first time Ellul and these authors will provoke readers to think some new thoughts about politics and government and think more deeply about the main issues we face in our politically divided and troubled times

Transmissibility and Cultural Transfer Jennifer, 2014-04-15 Edited by Stephanie Schwerter and Jennifer K Dick Transmissibility and Cultural Transfer Dimensions of Translation in the Humanities brings together monumental voices in the social sciences such as Jean Ren Ladmiral from Paris and Peter Caws from Washington DC to begin to address the Humanities specific issues with and debt to translation Calling for a re examination of how translations are read critiqued and taught in Philosophy History Political Science and Sociology departments this book provides tools for reflection bases for reconsideration of given translations and historical observations on how thought has been shaped across national borders The volume ends with four case studies examples from auto translation in postcolonial literature cultural issues of translation in Chinese language cinema negotiating meaning between linguistically and culturally different audiences in the United States and Lebanon to verbal visual questions of translation in marketing to German and French clients All in all this book is a comprehensive compact survey of the cultural and linguistic
