European VAT and the Sharing Economy Giorgio Beretta,2019-10-24 A breadth of new digital platforms has dramatically expanded the range of possibilities for exchanging anything required by business or personal needs from accommodation to rides In the virtual marketplaces shaped and ruled by these novel matchmakers rather than by a single centralized entity value is created through the granular interaction of many dispersed individuals By allowing instantaneous and smooth interaction among millions of individuals platforms have indeed pushed the digital frontier farther and farther so as to include within it even services once not capable of direct delivery from a remote location such as accommodation and passenger transport Legal disruption is also underway with foundational dichotomous categories such as those between suppliers and customers business and private spheres employees and self employed no longer viable as organizational legal structures This is the essential background of the first book to relate what is synthetically captured under the umbrella definition of sharing economy to key features at the core of European Value Added Tax EU VAT and to look at the feasibility of a reformed EU VAT system capable of addressing the main challenges posed by these new models of production

distribution and consumption of goods and services Specifically the study analyses five legal propositions underpinning the current EU VAT system as the following taxable persons taxable transactions composite supplies place of supply rules and liability regimes for collection and remittance of VAT Exploration of these five legal propositions is meant to assess the practical feasibility of shoehorning the main sharing economy business models notably those available in the accommodation and passenger transport sectors into the framework of existing EU VAT provisions The author further draws on the normative standards of equality neutrality simplicity flexibility and proportionality to test the reflexes of the current EU VAT system in the sharing economy domain Opportunities for reform of the current EU VAT system are in turn evaluated with each chapter including cogent proposals in the form of incremental and targeted amendments to the current EU VAT provisions As the first comprehensive analysis of the treatment of the sharing economy for VAT purposes the book provides not only a theoretical framework for future studies in the tax field but also indispensable practical guidance for VAT specialists confronting daily with the many challenges ushered in by the sharing economy Moreover the various solutions and recommendations advanced in the book offer valuable insights to international and national policymakers dealing with similar issues under other VAT systems
