Army,2000-07-01 Enthusiasts of the venerable Mosin Nagant bolt action rifle one of the most basic of the Russian and Soviet small arms will find a wealth of information in the latest Soviet military manual translation by Maj James F Gebhardt The manual available in English for the first time covers disassembly and assembly cleaning and lubricating and firing for zero at the specified zeroing range of 100 meters Described in detail are all the steps procedures and criteria that will ensure proper and safe function of the rifle or carbine Also included are several data tables describing the ballistic performance of the 148 grain type 1908 projectile and the weight and length of the basic rifle and carbines in various configurations For those interested in the sniper version of this rifle an appendix describes both the PE and PU scopes This is the ultimate source for Mosin Nagant owners

The Official Soviet Mosin-Nagant Sniper Rifle Manual ,2010-07-01 The Mosin Nagant bolt action rifle is the most basic of the Russian and Soviet small arms Before being replaced by the snayperskaya vintovka Dragunova SVD in the 1960s the selected scoped version of the rugged Mosin Nagant was the principal sniper rifle of the Soviet army and of many Eastern European militaries It is still used in many conflicts because of the large numbers in which it was produced This manual available in English for the first time is entirely devoted to the sniper version of the 1891 30 Mosin Nagant rifle with PU scope It covers disassembly and assembly cleaning and lubricating and other general technical information but its real value lies in the sniper specific tactics it contains Instructions and illustrations are included for the following topics sniper firing positions battlefield observation points range estimation how to fire at stationary fleeting moving and aerial targets two ballistic tables and much more This is a must have reference for Mosin Nagant rifle and sniper enthusiasts

Arctic Naval Combat in Support of Ground Operations Lester Grau,2025-12-01 Translated to English from the original Soviet General Staff report this is an account of the naval support of the Petsamo Kirkenes Operation in October 1944 the only large scale ground naval and air operation ever fought in the Arctic With additional contemporary supporting material on wider scale Arctic combat including descriptions of combat tactics and weaponry from noted Soviet military scholar James Gebhardt this book provides a comprehensive and detailed description of the tactics and strategies employed by both Soviet and German forces during the operation from the official Soviet perspective The largest Arctic battle on record involving 133 500 Soviets and 45 000 Germans and Quisling Norwegians the Petsamo Kirkenes Operation sought to liberate the northernmost part of Norway from German occupation during World War II The Soviet navy played a previously unrecognized crucial role in the operation by providing fire support and transportation as well as conducting raids and combat landings on the enemy held coast The harsh Arctic environment including extreme cold ice and limited daylight posed significant challenges to the Soviet and German forces Despite these hardships the Soviet forces achieved their objectives defeated the German Army and successfully liberated the area Arctic Naval Combat in Support of Ground Operations is a powerful companion to Gebhardt s previous

translation The Petsamo Kirkenes Operation Soviet Breakthrough and Pursuit in the Arctic October 1944 which details this operation s ground offensive Providing a starting point for the study and understanding of combined arms and services combat in the Arctic an increasingly important and accessible part of the planet where military concerns are rapidly expanding this work is a valuable addition to the literature of World War II military history and a significant additional perspective on the Soviet military
