Life Science Paper1 Scope November 2014:

Religious Perspectives on Social Responsibility in Health Joseph Tham, Chris Durante, Alberto García Gómez, 2018-04-26

This book discusses the meaning and implications of the social and ethical implications of the notion of social responsibility in healthcare in six major world religions: Buddhism, Christianity, Confucianism, Hinduism, Islam, and Judaism. This collection of papers is based on a four-day workshop where bioethics experts from various religious traditions gathered. They discussed the ways in which their respective traditions could or could not uphold the tenets of Article 14 of UNESCO's Universal Declaration of Bioethics and Human Rights. The different papers presented in this book are based on this interchange of ideas at the workshop. The book explores the potential points of convergence among the various perspectives presented as well as a discussion on the ways in which their moral differences may be managed. The managing of these moral differences through international socio-ethical mechanisms contributes significantly to the UNESCO Universal Declaration of Bioethics and Human Rights goal of simultaneously respecting religious-cultural pluralism while upholding a commitment to human rights.
