## **Memo For Rhino Poaching In Grade 11:**

**Transdex Index** ,1994 An index to translations issued by the United States Joint Publications Research Service JPRS

**Operation Lock and the War on Rhino Poaching** John Hanks,2015 The definitive account of a daring and controversial covert operation to stop the aggressive illegal trade in rhino horn in the 1980s *Ivory, Horn and Blood* Ronald Orenstein,2013-07-25 Meticulous research chilling facts an important and much needed book Dr Jane Goodall DBE Founder The Jane Goodall Institute If it is understanding you seek turn these pages Virginia McKenna OBE Founder The Born Free Foundation If you care about elephants and rhinos and the poaching onslaught that threatens their extinction in the wild this is the book for you Ian Redmond OBE Ambassador UN Great Apes Survival Program As recently as ten years ago out of every ten African elephants that died four fell at the hands of poachers The figure today is eight Over sixty percent of Africa's Forest Elephants have been killed by poachers since the turn of the century Rhinoceroses are being slaughtered throughout their ranges The Vietnamese One horned Rhinoceros and the Western Black rhino have become extinct in the last decade and the Northern White Rhinoceros the largest of them all barely survives in captivity This alarming book tells a crime story that takes place thousands of miles away in countries that few of us may visit But like the trade in illegal drugs the traffic in elephant ivory and rhinoceros horn has far reaching implications not only for these endangered animals but also for the human victims of a world wide surge in organized crime corruption and violence Since the worldwide ban on commercial ivory trade was passed in 1989 after a decade that saw half of Africa's elephants slaughtered by poachers Ronald Orenstein has been at the heart of the fight Today a new ivory crisis has arisen fuelled by internal wars in Africa and a growing market in the Far East Seizures of smuggled ivory have shot up in the past few years Bands of militia have crossed from one side of Africa to the other slaughtering elephants with automatic weapons A market surge in Vietnam and elsewhere has led to a growing criminal onslaught against the world's rhinoceroses The situation for both elephants and rhinos is dire Rhino Poaching Janina Naef,2016 Rhino horn is very popular in Asia as it is a status symbol and used as medicine That is one reason why the number of these animals is decreasing continuously In 2007 13 rhinos were poached in South Africa while in 2015 the number increased to 1175 rhinos This Matura Paper deals with problems of rhino poaching in South Africa It poses into the question if it is still possible to see rhinos in the future and examines what should be done to save this species from extinction Therefore 5 theses has been stated which consist of political financial protection measures and enlightenment of local and Asian people Thereby an interview has been conducted with a conservationist in addition to research in a volunteering project in South Africa regarding these theses The results prove the problems already stated If there are no changes in one of these problems the rhino doubtfully has a future Development of a Rhino Anti-poaching Model for Game Farms and Nature Reserves in the Free State Province of South Africa H.L. Jordaan,2018 During the last ten years the rhino populations of South Africa have suffered under an intense poaching onslaught This onslaught has moved to

the Free State Province of South Africa and there is a justified concern that its rhino populations are at risk To protect the rhinos in the Province a need exists to manage the risk of poaching through a practical rhino anti poaching model which can assist to protect them effectively This Rhino Anti Poaching Model can determine and predict a poaching risk can identify weaknesses can assist to address problem areas and will enable efficient monitoring It is imperative to know which rhino species occurred in the Free State Province in historical times to ensure that the correct rhino species is protected against the risk of poaching and that they be kept in a suitable habitat Nine farms in the Free Sate have rhino as a prefix in their names which may be an indication that rhino did occur in the Province Various historical photos and literature give a retrospective view and show that there was insufficient browsing vegetation for black rhinos to survive The occurrence of open grassland however suggests that white rhinos did occur in those specific areas during the time of the first pioneers During this study period a count of rhinos was done and currently there are 669 white rhinos and 11 black rhinos in the Province thus a total of 680 rhinos in the Free State Province The South African Constitution mandated the State to enforce measures that will ensure adequate environmental protection for the benefit of future generations The South African government promulgated a myriad of new environmental legislation Several international agreements were also introduced as enforcement tools to regulate rhinos The enforcement measures are noble but out of balance with many inspectors but too few law enforcement officials It also over regulates and ensnare officials in minor issues A brief discussion on the latest technological innovations gives insight to the purpose of its development and effectiveness in combating rhino poaching There are currently no technical or strategic solutions to save rhinos from poaching therefore a combination of techniques is needed Although self manufactured unconventional devices seem to be more efficient to deceive poachers a combination with the latest technological equipment and conventional strategies might be the best solution to counter rhino poaching Free State rhino farmers own 90% of the Province s rhinos However these rhino farmers lack the appropriate security measures required to adequately protect their rhinos A questionnaire was developed and data were collected providing statistics on the current stance of security measures on rhino sites in the Province It showed that 80% of rhino poaching occurs in rhino camps bordering public roads 69% of the rhino sites located within 20km from the nearest town reported poaching and 77% of large rhino camps are prone to poaching incidents 57% of the respondents experienced rhino poaching on their sites Through the questionnaire it was gathered that rhino farmers in the Province are not vested in the concept of using trained rhino security A Production Loss Formula was constructed that calculates the production loss of a poached rhino Four Years for the Rhino Kamalajanga Kumvara,2012 The Economics of Rhino Poaching Michael Dawes,2019

**Conservation of Rhinos and Reauthorization of the Sikes Act** United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Environment and Natural Resources,1994 Notebook RhinoiZQ Notebook,2019-12-22 College Ruled Color Paperback Size 6 inches x 9 inches 55 sheets 110 pages for writing Rhino

Poaching Is A Problem Here We Win Against Poachi 157691979023      **Guidelines for the in Situ Re-introduction and Translocation of African and Asian Rhinoceros** Richard Emslie, Richard Kock, 2009      **Under Siege** Vivek Menon, 1996

This reports documents the results of a study by TRAFFIC India with the support of WWF India The study began in 1992 and field updates continued to be received until April 1996 The report presents information on rhinoceros population poaching and trade in and use of rhinoceros horn      Rhinoceros Poaching (Misc. IF) ,1997      **Death and Destruction** Richard Wayne Charlton, 2017 The poaching of wildlife has been a concern to many involved in the protection of wildlife Poaching is found throughout the world and has been around for thousands of years In the past century poaching has reached new heights and the concern of an extinction of a species has brought the topic of poaching to new light Whilst poaching has been seen as a biological or conservation topic in the past criminologists around the world have now started to delve into the topic The poaching of wildlife and more so in recent years rhino poaching has been a concern in South Africa South Africa has seen an increase in rhino poaching in the past 8 years where over 4 000 rhinos have been slaughtered This research aims to give insight into the current rhino poaching epidemic in South Africa and looks at the problem from a criminological point of view where possible solutions can be recommend using criminological theories for the prevention of rhino poaching      **The Poacher's Moon** Richard Peirce, 2013-08-23      **Rhino War** Johan Jooste, 2021      An Analysis of Enforcement of Laws on Rhino Poaching in South Africa Malesela Samuel Mogoshi, 2016      Rhinoceros Horn Poaching Prevention Tessa Lucille Corbet, 2025 Rhinoceros rhino are an iconic species that barely survived extinction due to poaching and the illegal wildlife trade Today despite conservation efforts rhinos still face poaching as the biggest threat to their existence The white rhinoceros also known as square lipped *Ceratotherium simum* and the black rhinoceros *Diceros bicornis* are classified by the International Union for the Conservation of Nature IUCN as critically endangered and near threatened respectively Chanyandura et al 2021 Conservation efforts of the past 50 years have focused on repopulation and poaching prevention however while repopulation efforts have seen population growth in key range states poaching remains an issue Through case studies of the four rhinoceros range states with the majority of Africa s rhinos I will investigate what factors contribute to variation in rhinoceros poaching nationally in South Africa Namibia Kenya and Zimbabwe This study does this through a historical framework considering the political and social climates in each country I identify high levels of corruption private and public land ownership community engagement funding for conservation trophy hunting and ecotourism and the historical and political context as key variables that contribute to rhino protection or the lack thereof The future of rhino protection must include comprehensive well funded rhino management strategies that include anti corruption frameworks and community based conservation Engaging local communities and improving management on a national level is central to controlling the rhinoceros poaching crisis      **Analysis of Rhino Poaching Incidences and Management Strategies in South Africa** Sade Leigh Moneron, 2016      **Economic Incentives and Poaching of the One-Horned Indian**

**Rhinoceros in Nepal** Mahesh Poudyal, 2005 Despite a relatively successful conservation programme for the endangered one horned rhinoceros in the National Parks of the Terai region poaching remains one of the major threats to its survival in Nepal In recent years there has been an alarming rise in the number of rhinos poached over 100 rhinos were taken in and around the Royal Chitwan National Park RCNP between 1998 and 2003 Although rhino poaching levels are influenced by the price of rhino horn on the international black market amongst a host of other socio economic factors there have not been any attempts to study the reasons behind poaching in Nepal using econometric models developed and applied elsewhere This study uses econometric models to explain changes in the level of poaching in the RCNP over a 30 year period Factors that are thought to influence the number of rhinos poached in the RCNP include i rhino population ii effectiveness of anti poaching measures iii penalties for poaching iv availability of alternative economic opportunities i e opportunity costs of poaching and v the price of rhino horn The results indicate that anti poaching units APUs in their original organisational and operational form were highly successful in controlling the level of poaching in the RCNP Furthermore the availability of local economic opportunities seemed to reduce the level of poaching significantly However the penalties imposed on the convicted poachers were found to have little or no effect on the level of rhino poaching in the RCNP The results also indicate a sharp rise in the number of rhinos poached during the years of the Maoist insurgency in the country compared to the years before Although the analysis is still very simplistic it provides valuable insights into the factors that have affected the level of poaching in the RCNP over the years It is hoped that these insights will be helpful in formulating effective policies to tackle rhino poaching especially in and around the RCNP where Nepal's largest population of one horned rhinoceros is found

*The Black Rhino* R. Edward Freeman, 2017 John Hume a veteran game farmer and founder of the Mauricedale Game Ranch in South Africa was deeply troubled by the record upsurge in black rhino poaching incidents and black market horn thefts in 2010 and 2011 While the endangered black rhino represented only one segment of Mauricedale's hunting and farming businesses in 2011 the animal's survival was an important component of the ranch's and industry's growth potential in the future As both a businessman and a rhino advocate John Hume was contemplating an innovative idea that might help stop the decline of the black rhino the creation of a market for legalized black rhino hunting As he pondered the possibilities and alternatives to determine what his next move should be Hume had several questions on his mind Was the legalization of the international sale and trade of rhino horns a viable solution Was it Hume's responsibility to save the black rhino and was the animal a good investment
