The Failure of the Voice Referendum and the

Future of Australian Democracy Gabrielle Appleby, Megan Davis, 2026-01-13 Australia and Australians stood at a crossroads in October 2023. Before them lay a new and more accommodating way to practice democracy: a future in which First Nations people were given a representative voice in political decisions in this country. After months of a referendum campaign struggling over foundational ideals and questions of national identity, misinformation, disinformation, and racism, the proposal was overwhelmingly rejected in every Australian state and nationally. The referendum campaign was Australia's first since the failed attempt at a republic in 1999. The political and media environment in which the referendum campaign would unfold was fundamentally changed. These changes included the growth of social media, growing distrust of major political parties, and the rise of fake news and populist politics. This book brings together a diverse set of perspectives to explore the many and complex political, social, and historical factors that influenced the conduct of the campaign and led to the loss. It includes contributions from lawyers, political scientists, historians, human rights experts, health policy experts, land rights campaigners, and Indigenous affairs policy experts. The contributors in this book include First Nations and non-Indigenous authors often writing collaboratively. The majority of the views offered, based in expertise and experience, are those of First Nations. Their writings place the referendum loss in the context of political failure and attempts at structural reform and Australia's terrible record at amending the Constitution through referendums. The book traces the legal and political development of the draft constitutional provision and the influence of legal risk on the campaign. A major focus of the book is the impact of misinformation and disinformation, which was rife during the campaign and media reporting of it. The role that civil society and corporate Australia played in the campaign is considered. The Voice campaign will be placed in the context of Aboriginal and Torres Strait Islander politics and previous attempts at representation. The book will also place the call for Voice in the context of its ongoing relevance and imperative in Aboriginal and Torres Strait Islander affairs, explaining the power of representation, the Voice as an expression of sovereignty, and the need for Voice to pursue other structural reforms such as treaty and to realise the promise of land rights. The book concludes by reflecting on the role that history played in the campaign and the implications of the campaign for the practice of Australian history. The book holds lessons for future constitutional change, Indigenous recognition, structural reform, and Australia's democracy. It also looks with constructive pragmatism at the future direction of First Nations structural reform in Australia and the practice of democracy.

Economics for People and the Planet James Boyce, 2019-01-16 Economics for People and the Planet: a collection of essays by James K. Boyce on the environment, inequality, and the economy, argues that there is not an inexorable trade-off between advancing human well-being and having a clean and safe environment. The goal of economic policy should be to grow the good things that improve our well-being and environmental quality and reduce the bad things that harm humans and nature. To reorient the economy for these ends, we will need to achieve a more egalitarian distribution of wealth and

power Global climate change the most pressing environmental challenge of our time adds urgency to this task and creates historic opportunities for moving towards a greener future The audiobook version of Economics for People and the Planet features new chapters on the Green New Deal and the environmental costs of inequality Foreword by Manuel Pastor
