Mathematics Paper 2 June 2013:

The Extended Mind Annie Murphy Paul, 2021 A bold new book reveals how we can tap the intelligence that exists beyond our brains in our bodies our surroundings and our relationships

Restoring Opportunity Greg J. Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students *Restoring Opportunity* provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform *Restoring Opportunity* is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation's future depends Copublished with the Russell Sage Foundation

Indigenous Studies and Engaged Anthropology Paul Sillitoe, 2016-05-23 Advancing the rising field of engaged or participatory anthropology that is emerging at the same time as increased opposition from Indigenous peoples to research this book offers critical reflections on research approaches to date The engaged approach seeks to change the researcher researched relationship fundamentally to make methods more appropriate and beneficial to communities by involving them as participants in the entire process from choice of research topic onwards The aim is not only to change

power relationships but also engage with non academic audiences The advancement of such an egalitarian and inclusive approach to research can provoke strong opposition Some argue that it threatens academic rigour and worry about the undermining of disciplinary authority Others point to the difficulties of establishing an appropriately non ethnocentric moral stance and navigating the complex problems communities face Drawing on the experiences of Indigenous scholars anthropologists and development professionals acquainted with a range of cultures this book furthers our understanding of pressing issues such as interpretation transmission and ownership of Indigenous knowledge and appropriate ways to represent and communicate it All the contributors recognise the plurality of knowledge and incorporate perspectives that derive at least in part from other ways of being in the world
