Working-Class Utopias Robert M. Fogelson, 2022-10-18 One of the nation's foremost urban historians traces the history of cooperative housing in New York City from the 1920s through the 1970s. As World War II ended and Americans turned their attention to problems at home, union leaders and other prominent New Yorkers came to believe that cooperative housing would solve the city's century-old problem of providing decent housing at a reasonable cost for working-class families. *Working-Class Utopias* tells the story of this ambitious movement from the construction of the Amalgamated Houses after World War I to the building of Co-op City, the world's largest housing cooperative, four decades later. Robert Fogelson brings to life a tumultuous era in the life of New York, drawing on a wealth of archival materials such as community newspapers, legal records, and personal and institutional papers. In the early 1950s, a consortium of labor unions founded the United Housing Foundation under the visionary leadership of Abraham E. Kazan, who was supported by Nelson A. Rockefeller, Robert F. Wagner Jr., and Robert Moses. With the help of the state, which provided below-market-rate mortgages, and the city, which granted tax abatements, Kazan's group built large-scale cooperatives in every borough except Staten Island. Then came Co-op City, built in the Bronx in the 1960s as a model for other cities but plagued by unforeseen fiscal problems, culminating in the longest and costliest rent strike in American history. Co-op City survived, but the United Housing Foundation did not, and neither did the cooperative housing movement. *Working-Class Utopias* is essential reading for anyone seeking to understand the housing problem that continues to plague New York and cities across the nation. **British Naval**

Intelligence through the Twentieth Century Andrew Boyd, 2020-08-30 This is the first comprehensive account of how intelligence influenced and sustained British naval power from the mid-nineteenth century, when the Admiralty first created a dedicated intelligence department, through to the end of the Cold War. It brings a critical new dimension to our understanding of British naval history in this period, while setting naval intelligence in a wider context and emphasising the many parts of the British state that contributed to naval requirements. It is also a fascinating study of how naval needs and personalities shaped the British intelligence community that exists today, and the concepts and values that underpin it. The author explains why and how intelligence was collected and assesses its real impact on policy and operations. It confirms that naval intelligence was critical to Britain's survival and ultimate victory in the two World Wars, but significantly reappraises its role, highlighting the importance of communications intelligence to an effective blockade in the First, and according to Ultra, less dominance compared to other sources in the Second. It reveals that coverage of Germany before 1914 and of the three Axis powers in the interwar period was more comprehensive and effective than previously suggested, and while British power declined rapidly after 1945, the book shows how intelligence helped the Royal Navy to remain a significant global force for the rest of the twentieth century, and in submarine warfare, especially in the second half of the Cold War, to achieve influence and impact for Britain far exceeding resources expended. This compelling new history will have wide appeal to all readers.

Civic Engagement in Food System Governance Alan R. Hunt,2015-10-05 The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences

Beyond Grief Cynthia Mills,2014-09-23 This book attempts to set out at least part of the story of how high style funerary sculpture functioned at the turn of the twentieth century and in the decades immediately after a subject little investigated to date by scholars These monuments have not been considered in terms of their wider context and shifting use as objects of consolation power and multisensory mystery and wonder Rather they have mostly been considered as oddities a part of an individual artist s oeuvre a detail of a patron s biography or as local civic cemetery history Why did new forms many of them now produced in bronze rather than stone and placed in architectural settings arise just at this time and how did they mesh or clash with the sensibilities of their era Why was there a gap between the intention of these elite patrons and artists whose lives were often intertwined in a closed circle and the way some public audiences received them through the filter of the mass media
