**The Haze Problem in Southeast Asia** Helena Varkkey, 2015-07-16 Despite the efforts of Southeast Asian governments and of ASEAN transboundary haze continues to be a major environmental problem in Southeast Asia This book demonstrates that the issue is complex and explains why efforts to solve the problem in purely political terms are ineffective and likely to continue to be ineffective The book shows how state led state incentivised agribusiness development lies at the heart of the problem leading to a large rise in palm oil production with extensive clearing of forests leading to deliberate or accidental fires and the resulting haze Moreover although the forest clearing is occurring in Indonesia many of the companies involved are Malaysian and Singaporean and further many of these companies have close relationships with the politicians and officials responsible for addressing the problem and who thereby have a conflict of interest The author concludes by discussing the huge difficulties involved in overturning this system of patronage politics

*Achieving Food Security in China* Zhang-Yue Zhou, 2017-05-18 China's food security has never failed to attract the public's attention Feeding China's large population has always been a huge challenge The latest large scale famine took place in 1958-62 during which approximately 37 million people died of starvation However since the early 1980s China's food availability has improved drastically The important question is then has China achieved its food security Although China's food availability has significantly improved it has not achieved a high level of food security due to the lack of progress in several other important dimensions of food security The book examines China's food security practices in the past six decades explores the root causes that led to food shortages or abundances and elaborates on the challenges that China has to deal with in order to improve its future food security China's quest for food security serves as a valuable lesson for many other countries to learn through China's experiences and to better manage their food security in the future The book also draws attention to the fact that China's food security status has a huge impact on the global community and hence global collaboration is a mutually beneficial approach
