The Changing Practices of International Law Tanja Aalberts, Thomas Gammeltoft-Hansen, 2018-04-05 With more than 158 000 treaties and some 125 judicial organisations international law has become an inescapable factor in world politics since the Second World War In recent years however international law has also been increasingly challenged as states are voicing concerns that it is producing unintended effects and accuse international courts of judicial activism This book provides an important corrective to existing theories of international law by focusing on how states respond to increased legalisation and rely on legal expertise to manoeuvre within and against international law Through a number of case studies covering a wide range of topical issues such as surveillance environmental regulation migration and foreign investments the book argues that the expansion and increased institutionalisation of international law itself have created the structural premise for this type of politics of international law More international law paradoxically increases states political room of manoeuvre in world society

The State of African Cities, 2014 United Nations Publications, 2015-09-10 The African continent is

currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
