Literacy development is a necessary phase in the lives of all human beings. It is what enables people to function in a cohesive manner and to improve their society. Literacy goes beyond the ability of individuals to read and write since it encompasses the understanding of all elements of one's life and learning to interpret them. Thus, beyond reading and writing, one has to be able to make use of all their senses to develop an overall perspective of what is around them. Literacy development is a gradual and continuous process that happens throughout the life of a person since people come across new information every day. This essay shall highlight the major factors in my life that have contributed to my literacy development.

Literacy narrative essay example

My literacy development process began at home. I fondly remember the many times before bedtime when my mother would read a book to me with the hopes that I would fall asleep sooner than later so that she may begin to prepare for the next day. I could not understand some of what she was saying since my vocabulary was still limited at that time. On Saturdays, I would wake up and find my father reading the newspaper over the kitchen counter as usual. He would read the paper to me and teach me a couple of new words and their meanings. Soon after, Papa bought me my first alphabet book which helped me understand how to pronounce basic words.

Preschool was mostly drawings, paintings, and playing with puzzles. The teacher would read to us three times in one day. These sessions helped me a lot in building my vocabulary. Further, the constant communication with children from diverse backgrounds allowed me to learn new words from them. Words that they had heard from their distinct environments. Also, in preschool, I learned how to tell time. One day the teacher walked in with a wall clock and began pointing to the various hands and explaining what they all meant. I was so impressed I went back home in a jolly mood. On Sunday's my parents used to take me to our church's Sunday school program which was designed for teaching children religious songs and literature. I had memorized more about the Bible in song than I could read.

During kindergarten, I learned how to count up to ten, and the teachers taught us how to recite the alphabet and to recognize vowel sounds. I also learned how to develop a rhyme scheme through reciting poems. By the time I was in the first grade, differences in class were mainly based on the sexes where it was always boys versus girls. We associated certain behaviors and games with girls and others with boys. Thus, the learning curve was not only about reading and writing alone. However, the school was not the only place where I developed my literacy skills.

When I joined second grade, my father bought a Dell desktop computer. Computers were not commonplace back then as they are in current times. My dad used the desktop for his work correspondence, and when he was not using it, I would mimic his actions with the hope of turning it on. Courtesy of the easy user interface I was soon fairly computer literate. In school, an old
