Mapping Mass Mobilization Understanding Revolutionary Moments In Argentina And Ukraine:

Mapping Mass Mobilization O. Onuch, 2014-12-09 Through a paired comparison of two moments of mass mobilization in Ukraine and Argentina focusing on the role of different actors involved this text maps out a multi layered sequence of events leading up to mass mobilization

Three Revolutions: Mobilization and Change in Contemporary Ukraine I Pawel Mink, Georges Reichardt, Iwona Kowal, 2019-10-31 Volume One of Three Revolutions presents the overall research and discussions on topics related to the revolutionary events that have unfolded in Ukraine since 1990 The three revolutions referred to in this project include the Revolution on Granite 1990 the Orange Revolution 2004 2005 and the Euromaidan Revolution 2013 2014 The project s overall goal was to determine the extent to which we have the right to use the term revolution in relation to these events Moreover the research also uncovered the methodological problems associated with this task Lastly the project investigated to what extent the three revolutions are connected to each other and to what extent they are detached Hence the research in this volume not only discusses the theoretical aspects but also provides new analyses on such issues as religion memory and identity in Ukraine

The Power of Populism and People Nathan Stoltzfus, Christopher Osmar, 2021-08-12 Recent years have seen a disturbing advance in populist and authoritarian styles of rule and in response a rise in popular activism Strongmen especially since the advent of fascism have formed their base of power in popular acclaim But what power do the people have in checking the rise of tyranny In this book an international team of experts representing several academic disciplines examines the power relationship between peoples and their rulers It is among the first to study this globally as a problem of nation states From populism in 19th century Latin America to eastern Europe since the collapse of communism to the Arab Spring and contemporary Russia and China the cases in this book span five continents and twelve nations Taken together they reveal how different forms of popular opposition have succeeded or failed in unseating authoritarian regimes and expose the tactics and strategies used by regimes to repress people power and create an image of popular support Analysing the causes and consequence of the global advance of authoritarianism The Power of Populism and the People offers a historical comparison of popular protest opposition and crises over the last century to the recent rise of populist leaders

Handbook on Youth Activism Jerusha Conner, 2024-02-12 This dynamic Handbook offers state of the art analysis of the new generation of youth activists who are demanding change Bringing together eminent scholars rising academic stars and youth activists this Handbook provides a unique and essential insight into the power of youth activism today

The Ukraine Conflict Derek Averre, Kataryna Wolczuk, 2018-10-19 It is not hyperbole to suggest that the foundations of post cold war security in Europe have been badly damaged by the conflict in Ukraine since 2014 Russia s annexation of Crimea and intervention in eastern Ukraine appear to have created a simmering conflict which may take years to resolve and have profound consequences for the European security environment This volume explores the various political economic and social aspects of these profound changes and

their wider significance for Europe bringing together contributions by scholars from across the continent and in various disciplinary fields to offer an authoritative in depth examination of the complex causes of the Ukraine crisis and the consequences for Ukrainian statehood Ukraine's relations with Russia Russia's own domestic governance and Russia's relations with Europe This book was originally published as a special issue of Europe Asia Studies The Donbas Conflict in Ukraine Daria Platonova, 2021-09-27 This book examines why when the conflict in eastern Ukraine began in 2014 fighting broke out in the Donetsk region whereas it did not in Kharkiv city despite the city like the Donetsk region being geographically proximate to Russia and similar in ethnic and linguistic make up Based on extensive original research the book argues that a key factor was the nature and behaviour of local elites with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden profound regime change at the centre whereas the elites in the Donetsk region had much more concentrated ties to the centre were dependent on one network and therefore were much less able to cope with change The book thereby demonstrates how crucial for Ukraine are patronal politics patronage networks and informal centre region relations and that it was these local political circumstances rather than Russia which brought about the conflict *Revolutionary Moments and Movements* Olga Onuch, 2010 Alternative Representation Marshall Worsham, 2009 **Where Did Everyone Go? Social Movement Demobilization in Ukraine and Russia** Virginie Lasnier, 2017 Mass mobilizations are uplifting and powerful events However we still know little about how why and when such mobilizations unravel or what if any lasting consequences they have for civil society once they end In this dissertation I investigate the complex aftermath of mass movements by looking at their demobilization periods and their effects on civil society This demobilization process involves a decline in both protest activities organized by social movement organizations SMOs and number of activists over time combined with a reduction in the movement's societal resonance Throughout this thesis I make two related arguments I first contend that social movements demobilize when ordinary people lose interest in them reflected in an acceleration of the disengagement of rank and file protesters and contraction in a movement's societal resonance SMOs and their leaders do not initiate the demobilization process instead they must decide how to respond to it once it begins to occur Second I argue that while SMO leaders cannot prevent demobilization from occurring their choices determine which form's demobilization will take radicalization institutionalization abeyance and or disappearance These forms in turn have different implications for post mobilization civil society While disappearance and radicalization tend to yield negative outcomes especially in terms of the movement's societal acceptance institutionalization and abeyance may enable ongoing cooperation among former protestors and leave more resources for future mobilizations However as social movement demobilization is an evolving process the timing and interaction of these choices may also result in disunity polarization and marginalization These arguments go against the conventional wisdom that social movements are intrinsically productive with each episode a learning process that helps to further consolidate civil society I

make these arguments through a comparison of the demobilization processes of two post Soviet social movements The Ukrainian Orange Revolution 2004 in which mass mobilization succeeded in reaching its short term political objectives and the Russian movement For Fair Elections 2011 12 in which mobilization occurred but failed to meet its goals Both in Ukraine and Russia demobilization had unintended and problematic consequences for civil society While Ukrainian civil society had taken important steps toward consolidation before the Orange Revolution the fact that key leaders and groups were coopted during the movement affected their capacity to institutionalize afterward leaving Orange SMOs largely marginalized In Russia part of the movement For Fair Elections first demobilized through limited radicalization while another part demobilized through a premature departure into formal politics distracted by the regime s feigned openness to such participation These two different choices hindered the movement s later attempt to institutionalize placing the movement in abeyance by default and leaving ambiguous results for civil society My method combines a process tracing approach with protest event analysis for which I constructed an original database of over 3500 protest events based on Russian and Ukrainian newspapers and wire reports
