MINETTinett, William S-Y. WANG, 2009-07-07 A number of research groups around the world have begun to study how the brain acquires and processes language but we still know comparatively little about it Many such groups work on very specific often narrow problems This approach is certainly necessary but a broad perspective can be helpful if not essential too This volume consists of an important collection of papers presented at the Seminar on Language Evolution and the Brain SLEB hosted by the International Institute for Advanced Studies in Kyoto Japan bringing together distinguished researchers with background in cognitive science anthropology linguistics robotics physics etc Major topics discussed here include Creoles and pidgins and their implications regarding language evolution Quantitative analysis and modeling of various aspects of language evolution including the evolution of lexical items and color terms the emergence of linguistics categories and the dynamics of language competition The evolution of the human brain and how that relates to language evolution The evolution and the role of mirror neurons in both humans and non humans Evidence that the influence of language on color perception an example of the Whorf Effect is stronger for the right visual field than the left This volume provides a multi faceted discussion of how language evolves and shapes the brain that may entice university students and researchers to delve into this field with more background and curiosity Hebrew-English Edition of the Babylonian Talmud Isidore Epstein, 1984
