to adjust to the affordances found in digital spaces. However, challenges quickly arose and it was found that research was sorely needed on adapting learning to these digital spaces, including addressing issues with equitable access to technological tools, meeting the social/emotional needs of all learners, and developing appropriate teaching strategies for young children in online spaces. Situating our understanding of emerging research in this area of remote teaching and learning in Pre-K through higher education is critical as we look to build upon evidence-based practices to better support 21st-century educators and learners. *Cases on Practical Applications for Remote Hybrid and Hyflex Teaching* presents emerging case studies on the impacts of the COVID-19 pandemic and reports and responds to early evidence of these impacts and the predicted future impacts for students, families, teachers, policymakers, and higher education. Building on knowledge of how teaching and learning in digital spaces work, the literature presented in this book captures preliminary findings and emerging research examining how educators leverage teaching and learning across platforms and modalities and shares stories on how educators, families, and communities responded to the challenges of teaching and learning online to ensure all students were engaged and fully supported while learning remotely and as they transitioned back to the classroom. Covering topics such as pedagogies, remote teaching, and parental responses, it is ideal for teachers, academicians, preservice teachers, professors, researchers, community education providers, and students.
