Prospects for quinoa adaptation and utilization in Eastern and Southern Africa Maliro, M.F.A., Abang, M.M., Mukankusi, C., Lung'aho, M., Fenta, B., Wanderi, S., Kapa, R., Okiro, O.A., Koma, E., Mwaba, C., Isse, M.M. and Bazile, D., Food and Agriculture Organization of the United Nations, 2021-01-22 Quinoa *Chenopodium quinoa* Willd is an emerging crop in the world with great potential to contribute to Africa's food and nutritional security. The increased popularity of quinoa in the last few years is attributed to the impact of activities carried out within the framework of the International Year of Quinoa IYQ2013 which helped greatly to raise awareness on the crop's multiple nutritional benefits and its expanding cultivation globally. The Food and Agriculture Organization (FAO) which championed the IYQ2013 has worked with developing countries in Africa which are grappling with food and nutrition insecurity to introduce and promote cultivation of quinoa. Production and utilization of quinoa is expected to significantly reduce food and nutrition insecurity and help farming communities adapt to climate change. FAO implemented a Technical Cooperation on quinoa titled Technical Assistance for the Strengthening of the Food System of Quinoa TCP SFE 3406 implemented in 2014 to 2015. This project was designed to support the institutional capacities of seven countries including Djibouti, Ethiopia, Kenya, Somalia, South Sudan, Uganda, and Zambia in the production, evaluation, management, utilization, and marketing of Quinoa under diverse farming systems and agro-ecological zones. The project was implemented and led by the FAO Subregional office for Eastern Africa. SFE Quinoa evaluation trials that were conducted across multiple sites in the participating countries served as pilot adaptability studies for the crop. This technical paper presents key technological, institutional, and policy considerations for the successful introduction, adaptation, and utilization of quinoa in Africa.

An overview on local alternative ingredients, aquafeed supply and feeding management in selected African countries Food and Agriculture Organization of the United Nations, Garcia Sampaio, F. (ed.); Hasan, M.R. (ed.); El-Sayed, A-F.M. (ed.), Aquaculture plays a vital role in enhancing food security in Africa but faces challenges in the fed aquaculture sector particularly in accessing and producing high quality aquafeeds. To address this, FAO organized the Expert Workshop on Local Alternative Ingredients, Aquafeed Supply and Feeding Management in Egypt in 2023. Experts and stakeholders from nine African countries: Cameroon, Egypt, Ghana, Kenya, Malawi, Nigeria, Uganda, the United Republic of Tanzania, and Zambia participated alongside representatives from governments, academia, development agencies, the private sector, and farming communities. Pre-workshop questionnaires informed national reports on feed ingredient supply, feed manufacturing, and feeding management practices. These reports along with workshop discussions form the basis of this technical document comprising nine country analyses and a regional synthesis. Common challenges identified include limited access to alternative feed ingredients, poor feed preparation and storage practices, inadequate monitoring of on-farm feeding, lack of investment for small-scale producers, low technical capacity among farmers, poor feed quality, and weak regulatory frameworks. The synthesis report recommends key actions stabilizing feed ingredient supply and

costs promoting training for feed producers and farmers improving on farm feed and water quality management enhancing data collection and analysis expanding access to finance and storage facilities and strengthening collaboration among stakeholders These measures aim to build a more efficient sustainable and resilient aquaculture sector across the region

Fertilizer subsidies in Malawi: From past to present Benson, Todd, De Weerd, Joachim, Duchoslav, Jan, Masanjala, Winford, 2024-02-12 Malawi has been at the center of the debate on agricultural input subsidies in Africa ever since it significantly expanded its fertilizer subsidy program about two decades ago When it did so Malawi was a trailblazer receiving international attention for seemingly leveraging the subsidy program to move the country from a situation characterized by food deficits and widespread hunger to crop production surpluses In this paper we trace the history of Malawi's subsidy program over the past 70 years describing how the country arrived at that watershed moment earlier this century and how the subsidy program has developed since We show how donor support for the program has wavered and how external pressure to remove the subsidy has repeatedly been unsuccessful We also demonstrate how over the years the program's total fiscal burden has fluctuated significantly However we find that since the expansion of the subsidy program in 2004 the fiscal costs of the program have shown little correlation with the maize harvest that same agricultural season We show that the subsidy program has succeeded in raising awareness about the value of the fertilizer for increased crop productivity However despite its continued prominence in the country's agricultural policy most Malawian smallholder do not manage to grow sufficient maize to feed their households throughout the year and every year millions depend on food assistance during the worst months of the lean season
