Handbook of Research in Educational Communications and Technology M. J. Bishop, Elizabeth Boling, Jan Elen, Vanessa Svihla, 2020-09-21 The 5th edition of the prestigious AECT Handbook continues previous efforts to reach outside the traditional instructional design and technology community to the learning sciences and computer information systems communities toward developing a conceptualization of the field However given the pervasive and increasingly complex role technology now plays in education since the 1st edition of the Handbook in 1996 the editors have reorganized the research chapters in this edition to focus on the learning problems we are trying to solve with educational technologies rather than to focus on the things we are using to solve those problems Additionally for the first time this edition of the Handbook reflects

our field's growing understanding of the importance of design scholarship to inform practice by including design case chapters. These changes for this edition of the Handbook are intended to bring educational technology research into the broader framework of educational research by elaborating on the role instructional design and technology plays as a scholarly discipline in addressing education's increasingly complex issues. Provides comprehensive reviews of new developments in educational technology research and design practice. Includes concrete examples to guide future research and practice in the ways emerging technologies can be used to solve educational problems. Contains extensive references furnished to guide readers to the most recent research and design practice in the field of instructional design and technology.

Critical Reflections on Public-Private

Partnerships Jasmine Gideon, Elaine Unterhalter, 2020-12-21. This book argues that despite the hype within many policy circles, there is actually very little evidence to support the presumed benefits of Public-Private Partnerships (PPPs) in reducing poverty and addressing inequalities in the provision of and access to public services. Taking a cross-sectoral comparative approach, this book investigates how PPPs have played out in practice and what the implications have been for inequalities. Drawing on a range of empirical case studies in education, healthcare, housing and water, the book picks apart the roles of PPPs as financing mechanisms in several international and national contexts and considers the similarities and differences between sectors. The global COVID-19 pandemic has raised significant questions about the future of social provision and

through its analysis of the emergence and expansion of the role of PPPs the book also makes a vital contribution to current discussion over this rapidly changing landscape Overall this wide ranging guide to understanding and evaluating the role of PPPs in the Global South will be useful to researchers within development international relations economics and related fields as well as to policy makers and practitioners working in development related policy
