South Africa's Post-Apartheid Military Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil military relations of countries around the world. **Annual Report** South Africa. Department of Defence, 2016

Supporting Personalized Learning and Students' Skill Development With AI Khaldi, Mohamed, 2025-03-05 The integration of artificial intelligence (AI) into education has the potential to fundamentally change pedagogical practices with a positive impact on all aspects of teaching and learning. It is possible to design personalized learning paths for each learner, including those with special needs or who speak different languages, by adjusting the content and pace according to their strengths and weaknesses. AI tools such as virtual assistants and interactive educational applications can give immediate feedback to learners, which is of paramount importance to keep them engaged and encourage continuous learning. Similarly, teachers can view AI-based data analytics and recommendations to improve their teaching methods and adapt their strategies in real time. **Supporting Personalized Learning and Students Skill Development With AI** offers an in-depth exploration of how to integrate AI technology into pedagogical practice to revolutionize education by exploring all aspects of AI in education, from intelligent tutoring systems that tailor lessons to the needs of each learner to automating administrative tasks that save teachers time. While addressing the ethical and practical challenges of this transformation, it highlights the urgent need to equip educators with the skills they need to benefit from AI. Covering topics such as autonomous learning, emotion detection and digital literacy, this book is an excellent resource for teachers, school administrators, educational decision makers, computer developers, professionals, scholars, academicians, researchers and more. African Peace Militaries David Francis, 2017-08-16 This book provides a critical understanding of the emerging role of African militaries in peacetime democratic Africa. This book departs from the dominant perspective which simply presents the military as an enemy of democracy because of the history and legacy of

unending military coup d'états and interventions in civilian politics In the context of Africa the military has been blamed or largely held responsible for instigating wars armed conflicts political violence poverty and underdevelopment due to bad governance and mismanagement of the state Drawing from diverse case studies across Africa including Nigeria Rwanda Uganda Ethiopia and Egypt this volume presents the argument that though the military has played a negative and sometimes destructive role in undermining constitutional rule and the overthrow of democratic civilian governments the same military now operating in a changed global environment is making effort to support the development of democracy and democratic consolidation as well as remain subjected to civilian democratic oversight and control Notwithstanding the real challenge for this emerging trend of African peace militaries is the extent to which they are able to fulfil on a predictable and consistent basis their constitutional mandate to defend the people against elected autocrats in Africa who try to use the military to perpetuate themselves in power This work fills a critical gap in the literature and will be of much interest to students of African security and politics peace and conflict studies security studies and IR in general

State Schooling and the Reproduction of Social Inequalities Sharon Jones, 2022-12-30 This book critically explores the role of state schooling in the reproduction of social class inequalities in the UK By uniquely combining critical ethnographic methods with participatory

and visual research it foregrounds the experiences and recollections of working class adults in relation to their past schooling Drawing upon her own lived experiences Jones theorises the experiences of her participants using an analysis of Marxist Bourdieusian and Freirean frameworks to uncover relations of power and illustrate how schooling has reduced individual agency and sustained lived inequalities By creating space for a Visual Intervention within Critical Ethnography VICE alongside her analysis of class and society Jones successfully illuminates that working class struggles are not permanent and that agency can be activated The book also addresses an important need by centring research from the lived educational experiences of the working class and in particular working class adults Making a unique theoretical and methodological contribution using an innovative combined methodology approach the text ultimately highlights the potential of empowering disadvantaged individuals by raising critical consciousness Though it is focused on the experiences of adults this book has important understandings for all sectors of education and will be of interest to academics researchers and students interested in the sociology of education research methods in education social inequality social class and education politics

Young People and Uncertain Futures? James Goring, Peter Kelly, 2025-08-29 Drawing on Foucault's genealogical ethos and his work on power knowledge subjects this book analyses the ways in which neo liberal education apparatuses in Australia and other high income economies frame the problem of young people and uncertain futures The book critically examines the character of the presents and futures of education training and work and of the planet that have been produced in globalising neo liberal capitalism during the last four decades and which see in the development of young people's enterprise and aspiration the solutions to multiple crises and uncertainties It analyses how and why young people's behaviours and dispositions have been made knowable in these ways and the limits and possibilities that they produce for understanding what young people must be and become The book draws on post humanist feminist studies of techno science and futures studies to explore the promise of more socially just and sustainable futures for young people A thought provoking study for scholars and students of the sociology of education and of youth and society it will be invaluable for policymakers governments NGOs educators and undergraduate and postgraduate students interested in young people and the crises of capitalism earth systems and the biosphere

Navigating Uncertainty Ian Scoones, 2024-07-24 Uncertainties are everywhere Whether it's climate change financial volatility pandemic outbreaks or new technologies we don't know what the future will hold For many contemporary challenges navigating uncertainty where we cannot predict what may happen is essential and as the book explores this is much more than just managing risk But how is this done and what can we learn from different contexts about responding to and living with uncertainty Indeed what might it mean to live from uncertainty Drawing on experiences from across the world the chapters in this book explore finance and banking technology regulation critical infrastructures pandemics natural disasters and climate change Each chapter contrasts an approach centred on risk and control where we assume we know about and can manage the future with one that is more flexible responding to uncertainty The book argues that we need to adjust our modernist controlling view and to develop new approaches including some reclaimed and adapted from previous times or different cultures This requires a radical rethinking of policies institutions and practices for successfully navigating uncertainties in an increasingly turbulent world
