## **Martin Heidegger On Technology Ecology And The Arts:**

**Martin Heidegger on Technology, Ecology, and the Arts** A. Lack, 2014-11-04 Lack begins with a discussion of Max Weber's analysis of the disenchantment of the world and proceeds to develop Heidegger's philosophy in a way that suggests a re-enchantment of the world that faces the modern condition squarely without nostalgia **Reframing Human**

**Endeavors** Bagoes Wiryomartono, 2023-04-21 This ambitious text is a monograph about human experiences concerning the potentialities, capacities, and features of humankind from the wholeness of the collective mind/body/spirit. The purpose in reframing human endeavors is for enhanced alignment for livability and sustainability. This book departs from the concept and practice of design and technology and argues that most crises that endanger and destruct our ecological livability and sustainability come from our way of thinking and doing with design and technology based on the necessity for control. It is the control for overcoming the fear of scarcity, starvation, and the unknown. This book is rather an attempt to find alternate ways of decision making through holistic methods. It appeals to researchers working in design, sustainability, architecture, and urban studies **Phenomenology of Film** Shawn Loht, 2017-08-25

**Phenomenology of Film** A Heideggerian Account of the Film Experience uses the philosophy of Martin Heidegger as a framework for addressing key issues in the philosophy of film. This study grapples with the question of how we can reconcile film as a popular entertainment medium with Heidegger's own various critiques of popular media and culture throughout his career. Shawn Loht also explores topics such as the ontology of film and moving images, the phenomenological character of the viewer experience, film conceived as an art medium, and the function of films as vehicles for philosophical thought. He further discusses important concepts from Heidegger's philosophy: Dasein, existentiality, world, art, and poetry, and the nature of philosophy. The first four chapters take up these issues from a theoretical perspective. The remaining chapters provide robust application of the theoretical material to the films of three contemporary filmmakers: Terrence Malick, Michael Haneke, and David Gordon Green. As the first single author monograph that takes up Heidegger's relevance to film, *Phenomenology of Film* will be of particular interest to philosophers of film and specialists of film and media studies working in the intersection of phenomenology and film or phenomenological approaches to issues in popular culture **Returning to Interpersonal Dialogue and Understanding Human Communication in the Digital Age** Brown Sr., Michael A., Hersey, Leigh, 2018-07-20

Digital collaboration is abundant in today's world, but it is often problematic and does not provide an apt solution to the human need for comprehensive communication. Humans require more personal interactions beyond what can be achieved online. *Returning to Interpersonal Dialogue and Understanding Human Communication in the Digital Age* is a collection of innovative studies on the methods and applications of comparing online human interactions to face-to-face interactions. While highlighting topics including digital collaboration, social media, and privacy, this book is a vital reference source for public administrators, educators, businesses, academicians, and researchers seeking current research on the importance of non-digital communication between people **Re-enchanting**
