

Mass Casualty Triage

Scenario One

An adult and a child are bicycling down a hill when they lose control and go over an embankment, landing on the road. A car with four passengers swerves to avoid the bicycle and runs into a tree on the rear passenger's side. One person laying in the dirt and the four passengers of the car are visible.

Patient #1

Rear passenger, driver's side of car

28-year-old found ambulatory on scene trying to help driver out of the car Ambulatory- Feels slightly sick to your stomach but states "I'll be okay."

Patient #2

Driver of car

65-year-old with chest pains starting shortly after the accident

Originally able to walk, but so shaken by accident and new onset chest pain they are unable to sit down and refuses to get up (unable to walk)

Normal breathing, but respirations are 28 and feels slightly short of breath

Normal circulation with cap refill <2sec. but feels clammy

Normal mental status

Patient #3

Front, passenger of car

62 year old who hit head on side of door/window during impact with tree

Unable to walk- unresponsive

Normal breathing but respirations are 26

Normal circulation but has a large laceration across the right temple with profuse bleeding

Unable to follow commands- unresponsive

Patient #4

Rear, passenger side of car

9-year-old trapped in car due to two foot space intrusion into car by tree

Unable to walk- severe pain in the right leg and a laceration over the thigh which is pumping bright red blood everywhere

Normal breathing and respirations are 24 per min.

No palpable pulse in the right groin or foot, the right foot is white and cool to the touch, if the bleeding continues the entire body is going to be the same. There is an open right femur fracture with an arterial injury and going into shock due to blood loss.

Mass Casualty Patient Scenarios:

Medical Disaster Response David Goldschmitt, Robert Bonvino, 2009-05-22 While the job of a clinician in a disaster scenario is to save lives without regard for the cause or rationale for the injury medical and emergency professionals who understand the diverse aspects of a disaster are better equipped to respond effectively Giving emergency personnel the tools they need to perform in catastrophic situations Medical , *Emergencies in Urology* M. Hohenfellner, R.A. Santucci, 2007-08-18 *Emergencies in Urology* is a comprehensive textbook covering one of the few remaining white spots on the map of urological literature To date only a small number of publications have been dedicated to the topic of urgent and emergent problems in urology important as these are in our daily clinical life Therefore the editors both of them internationally recognized urological experts have taken the effort to present an in depth study into virtually every possible urgent urological situation with which a urologist may be confronted today Consequently the book includes chapters on topics such as urological trauma urosepsis urinary obstruction oncological emergencies intra and postoperative complications acute problems in children and many more To obtain the best possible expertise in such a wide field renowned expert authors have contributed their experience to this book They did so not only by writing the regular book chapters but also by delivering short stories about urgent situations they encountered in their own professional life These vignettes are one of the rare opportunities where experience can be relayed without restriction from one urological generation to the next Much work has gone into the illustrations for the book Foremost in this respect is the art of Stephan Spitzer one of the leading medical illustrators of today The result is a comprehensive well organized text in which state of the art know how didactic algorithms personal experience and detailed illustrations are combined into a unique guide of how to manage urological emergencies *Medicine Meets Virtual Reality 16* Randy S. Haluck, Helene M. Hoffman, Greg T. Mogel, Roger Phillips, Richard A. Robb, Kirby G. Vosburgh, 2008-01-15 We humans are tribal grouping ourselves by a multitude of criteria physical intellectual political emotional etc The Internet and its auxiliary technologies have enabled a novel dimension in tribal behavior during our recent past This growing connectivity begs the question will individuals and their communities come together to solve some very urgent global problems At MMVR we explore ways to harness information technology to solve healthcare problems and in the industrialized nations we are making progress In the developing world however things are more challenging Massive urban poverty fuels violence and misery Will global networking bring a convergence of individual and tribal problem solving Recently a barrel shaped water carrier that rolls along the ground was presented improving daily life for many people Also the One Laptop per Child project is a good example of how the industrialized nations can help the developing countries They produce durable and simple laptops which are inexpensive to produce At MMVR we focus on cutting edge medical technology which is generally pretty expensive While the benefits of innovation trickle downward from the privileged few to the broader masses we should expand this trickle into a flood Can breakthrough

applications in stimulation visualization robotics and informatics engender tools as ingeniously as the water carrier or laptop With some extra creativity we can design better healthcare for the developing world too
