of growth based on the model of the Nobel laureate Robert Solow expunges the spatial variable and is then gradually questioned in favour of the endogenous regional development approach Stimson et al 2011 Over time places take on the role of a favourable or unfavourable environment for business making possible the creation of external economies or diseconomies and giving rise to specific forms of cooperation between companies and societal actors At least to some authors what produces development and innovation in certain successful regions is in this sense not the assertion of a single company but the competitiveness of the entire territory expressed through the synergies between institutions and socioeconomic actors These synergies are the basis of the processes of accumulation of knowledge and the dissemination of information and opportunities useful for supporting development in the context of effective planning Dessein J Battaglini E and Horlings L 2016 The 20 cases described in this book are stemming from the debate raised by the International Conference on Research Outlook Innovations and Research Trends ICROIRT 2020 They are highlighting the time space dimension affecting economic structures and the ways in which socioeconomic use material and immaterial resources mediate practices and institutions and construct narratives and identities pointing to how assign value to their resources and thus influencing regional economics During a paradigm shift like which we are confronting facts are uncertain top down economic receipts in dispute and decisions urgent The Covid 19 crisis has already put at risk all organizations or companies that have basked in roles position rents or narratives that have shown resistance including ideological ones to the metamorphosis of the world underway We will now see what we can do as either individuals or organisations and institutions we are all responsibly involved We would like to thank all the contributors who have made the production of this book so fascinating and enjoyable Their scholarship and dedicated commitment and motivation to getting it right are the keys to the book s quality and we greatly appreciate their good nature over many months in the face of our editorial demands and time limits We are also grateful for using their texts ideas and critical remarks We would also like to thank Prof Dr Alimnazar Islamkov Dr R Shanthi all reviewers and all authors for their help in consolidating the interdisciplinary of the book
