1. Introduction

Thank you for purchasing MILAN by Transition's MIL-L100i Single Port Power over Ethernet (PoE) Injector. The MIL-L100i provides data and AC power through the Ethernet cable to PoE enabled devices, such as AP, a network camera, or other equipment supporting IEEE 802.3af. The injector is typically installed near the Ethernet switch.

MILAN by Transition's new EmPowered Ethernet™ Series Power over Ethernet solutions deliver unified supply of data, voice, and video as well as electrical power through a single source by sending power over standard Category 5 and above twisted pair cables. Power over Ethernet simplifies installation and eliminates the need to run separate power cords and LAN cables to each Access Point or port locations.

Our new PoE products provide organizations with affordable, easy-to-use solutions that enable them to migrate their network infrastructure to support a growing number of advanced cost-saving, performance enhancing applications, such as streamlining wireless, VoIP, Network IP camera deployments, and centralized power backup solutions. Whether on a factory floor or in an enterprise facility, running power to hard-to-reach locations with our Power over Ethernet solution significantly reduces cabling and outlet requirements while providing the lowest total cost of ownership.
