Annie Robertson Dyer,1924      **Capitalist Development in India's Informal Economy** Elisabetta Basile,2013-06-07 This  
book explores the economy and society of Provincial India in the post Green Revolution period It argues that the low quality  
of capital development in India s villages and small towns is the joint outcome of the informal economic organisation that is  
strongly biased in favour of capital and of the complex stratification of the workforce along class and caste lines Focusing on  
the processes of growth induced by the introduction of the high yield varieties in agriculture the book demonstrates that a  
low road pattern of capitalist development has been emerging in provincial India firms compete over price and not over  
efficiency with a constant pressure to reduce costs in particular labour costs The book shows that low skilled employment  
prevails and low wages and poor working conditions are widespread Based on original empirical research the book makes a  
valuable contribution to the debate on varieties of capitalism in particular of the Global South It is of interest to academics
