The Oxford Handbook of Kenyan Politics Nic Cheeseman, Karuti Kanyinga, Gabrielle Lynch, 2020-02-14 Kenya is one of the most politically dynamic and influential countries in sub Saharan Africa Today it is known in equal measure as a country that has experienced great highs and tragic lows In the 1960s and 1970s Kenya was seen as a success story of development in the periphery and also led the way in terms of democratic breakthroughs in 2010 when a new constitution devolved power and placed new constraints on the president However the country has also made international headlines for the kind of political instability that occurs when electoral violence is expressed along ethnic lines such as during the Kenya crisis of 2007/08 when over 1 000 people lost their lives and almost 700 000 were displaced The Oxford Handbook of Kenyan Politics explains these developments and many more drawing together 50 specially commissioned chapters by leading researchers The chapters they have contributed address a range of essential topics including the legacy of colonial rule ethnicity land politics devolution the constitution elections democracy foreign aid the informal economy civil society human rights the International Criminal Court the growing influence of China economic policy electoral violence and the impact of mobile phone technology In addition to covering some of the most important debates about Kenyan politics the volume provides an insightful overview of Kenyan history from 1930 to the present day and features a set of chapters that review the impact of devolution on regional politics in every part of the country

Country profile - Kenya: Gender, climate change, and nutrition linkages Mawia, Harriet, Ferguson, Nathaniel, Bryan, Elizabeth, Thomas, Timothy S., 2025-07-22 Agriculture is vital to Kenya's economy accounting for 20% of the country's GDP in 2020 Yet the growth of the sector has slowed in recent years due to unfavorable weather conditions leading to a reduction in crop and livestock performance Central Bank of Kenya 2023 While employment in agriculture has been steadily declining to 32% in 2023 the sector still employs a large share of the rural population and is the main source of informal employment rural income and livelihoods D Alessandro et al 2015 ILO 2025 A majority of Kenyan farmers operate on a small scale and are solely dependent on rainfall D Alessandro et al 2015 However since the 1970s the country has experienced significant changes in rainfall patterns average rainfall during the long season has decreased while rainfall during other times of the year has increased and the country has experienced more frequent climate extreme events Kogo et al 2021 Increased climate variability has negative effects on agriculture and may exacerbate inequalities within the sector Due to gender inequalities and gender differentiated roles in agrifood systems men and women do not experience climate change and variability in the same ways Balikoowa et al 2019 Lecoutere et al 2023 According to the World Economic Forum women are more vulnerable than men to climate change due to lower education and exclusion from the political and domestic decision making processes that affect their lives
