

Le spectre de l'asexualité, entre graysexualité et demisexualité

Certaines personnes se situent à une intersection entre l'asexualité et l'allosexualité (le fait de ressentir une attirance sexuelle régulière) et s'identifient à des étiquettes spécifiques, par exemple :

Les personnes graysexuelles ressentent rarement de l'attirance sexuelle ou seulement sous certaines conditions.

Les personnes demisexuelles n'éprouvent d'attirance sexuelle qu'après avoir développé un fort lien émotionnel. Ces expériences varient selon les individus et illustrent la diversité du spectre asexuel.
