The feeling you get when you can hit a tiny target almost out of sight is really amazing for many of us. Taking your skills to that level takes some time and training but it's gratifying when you achieve that next step in your shooting skill set. One reason many shooters are moving up to longer ranges is the challenge. It's pretty easy to hunt or plink at the range and get good hits on target sub 200 yards but as soon as you start to go longer then some skill is involved as is the need to do some basic math and use more tools. These complications mean that it's harder and more time consuming to shoot this way and that makes it appealing to those who want to go to the next level. Here we explain the basics of how to get started in Long Range Shooting.
