11. The gas particles inside a lower balloon, causing it to expand, will be moving at a faster (larger) rate.
12. The gas particles inside a lower balloon, causing it to contract, will be moving at a slower (smaller) rate.
13. The rate of molecular motion decreases as you go higher.

Using that model of the balloon should not depend on size, the gas particles should still move faster. Thus, think about what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon. That's what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon. That's what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon.

Inclusive College Classrooms Lauren S. Cardon, Anne-Marie Womack, 2022-12-27 Inclusive College Classrooms provides instructors with research based practices and tools to create an effective and inclusive classroom environment. Filling a visible gap in pedagogical training, this important book responds to current barriers to inclusion in higher education by helping instructors improve the methods they are already using and identify new methods that could enhance their courses. The inclusive approach in this book is informed by critical pedagogy, universal design for learning, and intersectional social justice pedagogies. The authors identify practices in education that exclude historically marginalized groups and outline teaching strategies that can create more inclusive classrooms where all students can feel heard and represented. This timely volume is packed full of hundreds of example lessons from across a range of disciplines, tips for moving classes online, questions to generate dialogue about various methods, and appendices on lesson planning. With this book in hand, instructors can continually adapt and revise their pedagogy to be more inclusive and effective.

writing equations converting among forms sparknotes - Apr 06 2022

thus to convert to point slope form first convert to slope intercept form then move the constant term b to the left side of the equation or isolate x and then divide by the y coefficient example convert $3x + 4y = 8$ to point slope form

point slope slope intercept equations algebra video khan academy - Mar 17 2023

point slope is the general form $y - y_1 = m(x - x_1)$ for linear equations it emphasizes the slope of the line and a point on the line that is not the y intercept we can rewrite an equation in point slope form to be in slope intercept form $y = mx + b$ to highlight the same line's slope and y intercept

intro to point slope form algebra video khan academy - Aug 22 2023

the point slope form is very useful when you don t have your y intercept it is used to write equations when you only have your slope and a point point slope form $y - y_1 = m(x - x_1)$ for example your slope m is 3 and your point a b is 9 10 you would substitute your y coordinate for a and your x coordinate for b
