Modeling with Differential Equations in Chemical Engineering Stanley M. Walas, 1991 Modelling with Differential Equations in Chemical Engineering covers the modelling of rate processes of engineering in terms of differential equations While it includes the purely mathematical aspects of the solution of differential equations the main emphasis is on the derivation and solution of major equations of engineering and applied science Methods of solving differential equations by analytical and numerical means are presented in detail with many solved examples and problems for solution by the reader Emphasis is placed on numerical and computer methods of solution A key chapter in the book is devoted to the principles of mathematical modelling These principles are applied to the equations in important engineering areas The major disciplines covered are thermodynamics diffusion and mass transfer heat transfer fluid dynamics chemical reactions and automatic control These topics are of particular value to chemical engineers but also are of interest to mechanical civil and environmental engineers as well as applied scientists The material is also suitable for undergraduate and beginning graduate students as well as for review by practising engineers Books in Print ,1994 **Books in Print Supplement** ,2002

Special Purpose Computers Berni J. Alder, 2014-05-10 Special Purpose Computers describes special purpose computers and compares them to general purpose computers in terms of speed and cost Examples of computers that were designed for the efficient solution of long established algorithms are given including Navier Stokes hydrodynamic solvers classical molecular dynamic machines and Ising model computers Comprised of seven chapters this volume begins by documenting the progress of the CalTech Concurrent Computation Program and its evolution from computational high energy physics to a supercomputer initiative with emphasis on the lessons learned including computer architecture issues and the trade offs between in house and commercial development The reader is then introduced to the QCD Machine a special purpose parallel supercomputer that was designed and built to solve the lattice quantum chromodynamics problem Subsequent chapters focus on the Geometry Defining Processors and their application to the solution of partial differential equations the Navier Stokes computer parallel processing using the Loosely Coupled Array of Processors LCAP system and the Delft Ising system processor The design and implementation of the Delft molecular dynamics processor are also described This book will be of interest to computer engineers and designers Spectroscopy of Inorganic Bioactivators T. Theophanides, 2012-12-06 This edition is the labor of many enthusiastic scientists who were invited to teach at a NATO Advanced Study Institute on the Spectroscopy of Inorganic Bioactivators which took place on August 20-30 1988 at Club Poseidon Loutraki Greece In this book the subjects were taught through several well prepared lectures These lectures stretch the fact that scientific knowledge is the painfully gathered product of many wonderful human minds I made an attempt to divide the lectures into separate chapters however there is interaction among the lectures as I hope the book will show First there is introductory on an lecture supercomputing and super computers and their applications to solving

structures of biological molecules followed by a state of the art x ray diffraction method at picosecond times Important new advances have been made in x ray diffraction analysis at picosecond times in Raman spectroscopy in micro Raman spectroscopy in the Near Infrared region 1 01 μ m and remote sensing by Fourier Transform Infrared Spectroscopy The chapters that follow include applications of spectroscopic technique to various biologically important molecules such as DNA proteins membranes and metal ion biological molecule interactions I would like to express my thanks to all the authors for their contributions and their cooperation in submitting their manuscript I also thank the NATO Science Committee for making this possible The field looks very promising for significant and exciting developments in the application of spectroscopy to bioactivators
