## **Modern Banking Law Ellinger 5th Edition:**

**Ellinger's Modern Banking Law** Eliahu Peter Ellinger, Eva Z. Lomnicka, E. Lomnicka, C. Hare, 2011-07-21 This book looks at the UK banking in the context of general legal doctrines and banking regulation It draws on Australian US and Canadian examples and deals with the impact of the recent global financial crisis Banking Law and Financial Regulations John Abolarin, 2025-01-03 Evaluating the financial accounts of the Royal Bank of Scotland Group Barclays HSBC and Standard Chartered Bank from 2004 2018 reveals a taste of the sweetness of success It also demonstrates what could go wrong in a mega bank the crippling price of failure and the long hard road to recovery This book is a historical account of the causes of instability in the banking sector in the past 40 years and an evaluation of the effectiveness or otherwise of a range of laws and regulatory measures adopted to remedy financial crises in the UK over the years In addition the book provides a broad review of the evolutionary development of banking and financial laws starting with seminal case laws on the subject the Banking Act 1979 the repealed Banking Act 1987 FSMA 2000 the Company Act 2006 the Banking Reform Act 2013 Basel Accords and sundry EU Directives John a Barrister at Law offered a robust blend of theoretical knowledge and twenty years of practical industry experience in a commercial bank to provide legal perspectives on supervisory models necessary for stability in the banking sector while promoting justification for creating an enabling environment for wealth creation and economic growth The Methods and Methodology chapter would be an invaluable companion for postgraduate students and researchers **The Financial Courts** Jo Braithwaite, 2021-01-07 In The Financial Courts Jo Braithwaite analyses thirty years of cases involving the global derivatives markets exploring the nature of these legal disputes and assessing their impact on financial markets and on commercial law more broadly Weaving together this substantial body of cases with theoretical insights drawn from the growing literature on the internationalisation of financial law Braithwaite offers readers a detailed and highly original contribution to the debate about the role of private law in international financial markets This important work should be read by lawyers economists and regulators in the field Credit and Creed Andreas Rahmatian, 2019-10-28 Money is a legal institution with principal economic and sociological consequences Money is a debt because that is how it is conceptualised and comes into existence as circulating credit if viewed from the creditor's perspective or from the debtor's viewpoint as debt This book presents a legal theory of money based on the concept of dematerialised property It describes the money creation or money supply process for cash and for bank money and looks at modern forms of money such as cryptocurrencies It also shows why mainstream economics presupposes but avoids an analysis of money by effectively eliminating money from the microeconomic market model and declaring it as merely a neutral medium of exchange and unit of account The book explains that money rather brings about and influences substantially the exchange or transaction it is supposed to facilitate only as a neutral medium As the most liquid of all assets money enables financialisation monetisation and commodification in the economy The central role of the banks in the money creation process and in the economy and

their strengthened position after the bank rescue measures in the wake of the financial crisis 2008-9 are also discussed. Providing a rigorous analysis of the most salient legal issues regarding money, this book will appeal to legal theorists, economists and anyone working in commercial or banking law.

**Alternative Lending** Promitheas Peridis, 2022-09-30. The book covers alternative lending using the emergence of Debt Funds in the EU as a case study. The book explores the risks that they can pose to financial stability and the regulatory and supervisory tools available to mitigate these risks. Through this analysis, the book uncovers the risks and potential risk mitigation tools that can be applied to the alternative lenders, including debt funds and other potential alternative lenders. After identifying the reasons behind the growth of alternative lenders, using as an example the assets of Alternative Investment Funds (AIFs) and in particular debt funds and the simultaneous decrease of the banks' assets, the book analyses the systemic importance of the alternative lenders and the risk channels through which the systemic risk can spread to the banking sector and the financial system. Then, the book deals with the financial innovation market failure theory and demonstrates that financial innovations, e.g. debt funds securitisations, can cause market failures resulting in regulatory interventions. Of interest to banking and financial regulation academics, researchers and practitioners, this book analyses the regulatory provisions in place for both credit institutions and debt funds, including the Basel Accords, the Capital Requirements Directives and Regulations, and the Alternative Investment Fund Managers Directive (AIFMD) and its implementation in various EU jurisdictions, before offering a proposal for a new three-defensive framework applicable to debt funds and to other potential alternative lenders.

*The International Sale of Goods 5e* Michael Bridge, 2023-11-09. The fifth edition of this leading authority continues to provide comprehensive analysis of the law and practice of sale of goods under English and international law. The detailed commentary provides analysis on decided cases as well as on standard form contracts that represent evolving trade practice. This edition offers updated and essential analysis of the rapidly evolving law related to the CISG, including an assessment of how specific issues, such as no oral modification clauses, might be addressed under the Convention. In addition, it provides expanded coverage of standard form contracts beyond the dry trades, including developments in electronic documentation and further treatment of notices of appropriation and force majeure. Further, there is a discussion of Incoterms 2020 and an expanded and updated treatment of contractual estoppel, good faith and contractual discretion, contractual termination and damages. As ever, the law is explored in the context of commercial practice, making the book an ideal reference source for practitioners, scholars and postgraduate students.
