Imagine if a student spent as much time managing information as celebrities doted on dieting While eating too much food may be the basis of a moral panic about obesity excessive information is rarely discussed as a crisis of a similar scale Obviously plentiful and high quality food is not a problem if eating is balanced with exercise But without the skills of media and information literacy students and citizens wade through low quality online information that fills their day yet does not enable intellectual challenge imagination and questioning Digital Dieting From Information Obesity to Intellectual Fitness probes the social political and academic difficulties in managing large quantities of low quality information But this book does not diagnose a crisis Instead Digital Dieting provides strategies to develop intellectual fitness that sorts the important from the irrelevant

and the remarkable from the banal In April 2010 and for the first time Facebook received more independent visitors than Google Increasingly there is a desire to share rather than search But what is the impact of such a change on higher education If students complain that the reading is too hard then one response is to make it easier If students complain that assignments are too difficult then one way to manage this challenge is to make the assignments simpler Both are passive responses that damage the calibre of education and universities in the long term Digital Dieting From Information Obesity to Intellectual Fitness provides active conscious careful and applicable strategies to move students and citizens from searching to researching sharing to thinking and shopping to reading

Deadlines and Disruption: My Turbulent Path from Print to Digital Stephen Shepard, 2012-08-21. A Top Editor's Take on the State of Journalism Today and His Prescient Forecast of Its Future. This is a personal and insightful book about one of the most important questions of our time: how will journalism make the transition to the digital age? Steve Shepard made that leap bravely when he went from being a great magazine editor to the first dean of the City University of New York journalism school. His tale is filled with great lessons for us all. Walter Isaacson, bestselling author of *Steve Jobs*, An insightful and convivial account of a bright, bountiful life dedicated to words, information and wonder. Kirkus Reviews Starred Review. This is two compelling books in one: Shepard's story of his life in print journalism and a clearheaded look at the way journalism is evolving due to electronic media, social networking and the ability of anyone with a computer and an opinion to make him or herself heard. Booklist: Shepard's book will resonate with many and should be read by anyone interested in the flow of information today and its impact on society as a whole. Library Journal: The book is in part a memoir, a tale of a life lived at the height of print journalism when print journalism itself was at its height. But it is also an analysis, an examination of the new challenges facing an old industry as it ambles and occasionally sprints its way into the digital age. The Washington Post: About the Book: My personal passage is in many ways a microcosm of the larger struggle within the journalism profession to come to terms with the digital reckoning. Will the new technologies enhance journalism or water it down for audiences with diminished attention spans? What new business models will emerge to sustain quality journalism? Stephen B. Shepard has seen it all. Editor in chief of *BusinessWeek* for more than 20 years, Shepard helped transform the magazine into one of the most respected voices of its time. But after his departure, he saw it collapse, another victim of the digital age. In *Deadlines and Disruption*, Shepard recounts his five decades in journalism, a time of radical transformations in the way news is developed, delivered and consumed. Raised in the Bronx, Shepard graduated from City College and Columbia, joined *BusinessWeek* as a reporter and rose to the top editorial post. He has closed the circle by returning to the university that spawned him, founding the Graduate School of Journalism at the City University of New York. In the digital age, anyone can be

a journalist Opinion pieces are replacing original reporting as the coin of the realm And an entire generation is relying on Facebook friends and Twitter feeds to tell them what to read Is this the beginning of an irreversible slide into third rate journalism Or the start of a better world of interactive multimedia journalism Will the news industry live up to its responsibility to forge a well informed public Shepard tackles all the tough questions facing journalists the news industry and indeed anyone who understands the importance of a well informed public in a healthy democracy The story of Shepard s career is the story of the news industry and in *Deadlines and Disruption* he provides peerless insight into one of the most critical issues of our time **Business Week** ,2010 **Bloomberg Businessweek** ,2011 *One Proud Legacy, Two Powerful Companies (EBOOK)* McGraw-Hill Education,2012-10-22 In celebrating its 125th anniversary McGraw Hill examines its past and looks ahead to a bright future *One Proud Legacy Two Powerful Companies* traces McGraw Hill s roots in the emerging railroad industry and explores the remarkable opportunities to come as it separates into two independent companies one focused on education the other on the global capital and commodity markets Following the sale of McGraw Hill Education expected early 2013 the company s shareholders are anticipated to rename the company McGraw Hill Financial The new company will include some of the most well known names in finance and business including Standard Poor s S P Capital IQ S P Dow Jones Indices Platts and J D Power and Associates McGraw Hill Financial and McGraw Hill Education will continue the mission set out by founder James H McGraw in 1888 give people the insight and essential intelligence they need to make decisions vital for their future **Hotelier** ,2010 *Impacts of iPad Attributes, Lifestyles and Media Dependency on Adoption of iPad and Intensity of iPad Usage in Mainland China* Li Xinpeng Kevin,2012 The goal of this exploratory research is to identify attributes that can distinctly characterize iPad and examine the predictive power of iPad attributes lifestyles media dependency and demographics on adoption of iPad iPad usage patterns and intensity of iPad usage Using a snowballing sample an online survey was conducted with 623 university students in Mainland China among which 217 were iPad users and 406 were non users Results of regression analyses show that application affordances is one of the few important attributes influencing the likelihood of iPad adoption iPad usage patterns and intensity of iPad usage Regarding lifestyles strivers were found to be associated with higher likelihood of buying iPad experiencers were more engaged and active when using iPad innovators tended to use iPad for utilities information seeking and communication more often than other users Interestingly owning other Apple products has a positive impact on purchasing iPad Furthermore among iPad usage patterns in particular utilities and information seeking are significant predictors for Intensity of iPad usage which proves to be the most important functionalities for iPad iPad attributes Lifestyles Media Dependency Adoption of iPad Intensity of iPad usage
