machine **Made-to-measure Problem-solving** Victor Newman,1997 Victor Newman's practical book strikes at the heart of fundamental challenges faced by all managers. It looks beyond the conventional techniques of problem solving to the underlying process, identifies eight stages and explains how to recognise which technique is appropriate to which stage. On this basis, managers can generate solutions at both the personal and the organisational level. Change and the Bottom Line Alan Warner,1997 How do you plan and implement change? How do you monitor progress? What models and concepts are available to help? How can you identify resistance and deal with it? These are some of the questions addressed in Alan Warner's compelling business novel. Phil Moorley has just become CEO of a family firm in the north of England and his main task is to change its culture so that it can meet the challenges that lie ahead. He enlists the aid of Christine Goodhart, training consultant, long time friend and sometime mistress. **Stand and Deliver** Ralph L. Kliem, Irwin S. Ludin,1995 In this book you will learn how to define the audience, determine what to say, organize the content, control nervousness, deliver in style, use visual aids, deal with questions. The fictional treatment makes this an entertaining as well as an informative guide. As an additional aid to learning, the key points are summarized in checklist form at the end of the book. *Stand and Deliver* will be valued by all managers faced with the need to give effective presentations. *What is this Thing Called Theory of Constraints and how Should it be Implemented?* Eliyahu M. Goldratt,1990 This book is written in the attempt to deal with two major questions: what are the thinking processes that enable people to invent simple solutions to seemingly complicated situations, and the question of how to use the psychological aspects to assist rather than impair the implementation of those solutions in a mode of an ongoing process. Practical NLP for Managers Ian McDermott, Joseph O'Connor,1996 NLP (Neuro Linguistic Programming) is a powerful communication skills tool for every manager who wants to improve their powers of persuasion and leadership. There are many books setting out the relevant techniques; this is the first to show them at work in a practical management setting. The authors, both of them experienced NLP trainers, look in turn at each of the key elements in the management process and show how NLP can help. They explain how to capture other people's attention and trust, how to motivate, how to use language including body language to maximum effect, how to handle staff appraisals, how to develop a consistent set of organizational values. **APICS, the Performance Advantage** ,1999 **Manufacturing Competitiveness Frontiers** ,1995 *Journal of Cost Management* ,1997 **Industrial Management** ,1996 *From Concepts to Capabilities* Jacques A.
