KEYSTONE BIOLOGY STUDY GUIDE

Keystone Biology Review - Module 1 – CELLS AND CELL PROCESSES

All living things have the following characteristics:

- They are all made of cells: either one cell (**unicellular**) or many cells (**multicellular**).
- They reproduce **sexually** (using 2 parents) or **asexually** (1 parent).
- They perform **respiration** to make energy available to the cell.
- They carry on **metabolic** activities (chemical reactions).
 - This includes: **Synthesizing** larger compounds
 - Digesting** larger compounds to smaller
- They grow and develop
- They respond to environmental stimuli and maintain homeostasis (constant internal condition despite external conditions)

There are 2 Major Cell Types: **Prokaryotes** and **Eukaryotes**.

Differences are shown below:

Prokaryotes	Eukaryotes
Simpler; Unicellular Smaller No true nucleus because there is no membrane around their DNA No complex organelles Includes Bacteria	More complex; Multicellular; Cell specialization Larger A membrane around their DNA (A Nucleus!) Complex organelles (Mitochondria, Endoplasmic reticulum, Golgi, Chloroplasts Includes Animals, Plants, Fungi

Similarities between Prokaryotes and Eukaryotes

Both have:

- Cell membrane/plasma membrane – semi-permeable and regulates what enters and exits the cell
- Ribosomes** – make proteins for the cell
- Cytoplasm** – site of various chemical reactions

What are some complex organelles in Eukaryotic cells?

- **Mitochondria** – makes energy (ATP) for the cell using the process of cellular respiration
- **Chloroplasts** – make sugar and oxygen using the process of photosynthesis.
- **Rough Endoplasmic reticulum** – transports proteins
- **Smooth Endoplasmic reticulum** – makes lipids
- **Golgi Complex** – modifies and packages proteins
- **Nucleus** – control center of the cell, houses the cell's DNA
- **Lysosomes** – "suicide sac of the cell" contains strong digestive enzymes

Living things are organized in the following way:

All cells and organs have a specific shape because they do a specific function.

Example: Alveoli are structures in the lungs. They are little sacs with lots of little spaces.

Keystone Biology Study Guide

David Baud

Keystone Biology Study Guide:

When people should go to the ebook stores, search creation by shop, shelf by shelf, it is in point of fact problematic. This is why we offer the ebook compilations in this website. It will unquestionably ease you to look guide **Keystone Biology Study Guide** as you such as.

By searching the title, publisher, or authors of guide you really want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best place within net connections. If you try to download and install the Keystone Biology Study Guide, it is extremely simple then, previously currently we extend the associate to purchase and make bargains to download and install Keystone Biology Study Guide correspondingly simple!
