Natural Science Gr9 End Year Exam Paper:

Translanguaging, Coloniality and Decolonial Cracks Robyn Tyler, 2023-01-13 In this linguistic ethnography of bilingual science learning in a South African high school the author connects microanalyses of classroom discourse to broader themes of de coloniality in education The book challenges the deficit narrative often used to characterise the capabilities of linguistically minoritised youth and explores the challenges and opportunities associated with leveraging students full semiotic repertoires in learning specific concepts The author examines the linguistic landscape of the school and the beliefs and attitudes of staff and students which produce both coloniality and cracks in the edifice of coloniality A critical translanguaging lens is applied to analyse multilingual and multimodal aspects of students science meaning making in a traditional classroom and a study group intervention Finally the book suggests implications for decolonial pedagogical translanguaging in Southern multilingual classrooms

Bilingual Education and Language Policy in the Global South Jo Arthur Shoba, Feliciano Chimbutane, 2013-07-18 This volume considers a range of ways in which bilingual programs can make a contribution to aspects of human and economic development in the global South The authors examine the consequences of different policies programs and pedagogies for learners and local communities through recent ethnographic research on these topics The revitalization of minority languages and local cultural practices management of linguistic and cultural diversity and promotion of equal opportunities both social and economic are all explored in this light

Towards Gender Equity in Mathematics Education Gila Hanna, 2006-04-11 THE REAL WORLD OF MATHEMATICS SCIENCE AND TECHNOLOGY EDUCATION In this Preface I would like to focus on what I mean by education and speak about the models and metaphors that are used when people talk write and act in the domain of education We need to look at the assu tions and processes that the models and metaphors implicitly and explicitly contain I feel we should explore whether there is a specific thrust to mat matics education in the here and now and be very practical about it For me education is the enhancement of knowledge and understanding and there is a strong and unbreakable link between the two There seems l tle point in acquiring knowledge without understanding its meaning Nor is it enough to gain a deep understanding of problems without gaining the appropriate knowledge to work for their solution Thus knowledge and understanding are each necessary conditions for the process of education but only when they are linked will the process bear fruit Only in the b anced interplay of knowledge and understanding can we expect to achieve genuine education
